UDSEL These admissions in an editorial that traditionally praises the country's political and economic situation under Communist Party lead-ership were themselves a measure of the severity of the current economic crisis, and the unprecedent-ed candor was undoubtedly intended to demonstrate that there has been a real change in policy.

An Extraordinary Indictment

The acknowledgement of the danger posed by inflation, for ex-ample, recalls the rampant infla-tion of the 1940s preceding the downfall of the Chinese Nationalist government, and belies the Communists' old boast to bave ended that problem. The criticism of the country's past development strategy, going back virtually to the Communist takeover in 1949. is not just a further abandonment of the policies of Mao Tso-tung,

but an extraordinary indiciment of Socialism's central planning. With new policies, many of which are still being worked oot, the paper commented, "we can say that from now on we are really

freeing ourselves from the trap of leftist ideas." After the Communist victory, the party pushed hard for fast economic growth, the paper said, and "failed to proceed strictly from the

objective conditions and observe conomic laws" in trying to fulfill its promise of making China a rich and powerful modern state. "As a result, 'leftist' errors have long existed in economic work," the editorial said. on Monday.

Algerians Give Iranians U.S. Hostage Proposals

By Jonathan Sharp Revters

TEHRAN — The latest U.S. proposals for ending 14 months of captivity for 52 American hostages were handed to Iran Friday by three Algerian intermediaries. There was oo indication of how

long Iranian authorities would take to consider a response. The three Algerian envoys spent 15 days here last month while the Iranians deliberated over their previous reply.

. The United States has given Iran until Jan. 16 to accept the proposals, which may be withdrawn by the incoming Reagan administration after it takes office

Official U.S. sources said that

unless the proposals are accepted by Jan. 16, the Carter administra-

tion will not have time to imple-ment the complicated legal and administrative actions concerning Iranian financial assets before it leaves office. Iran demanded in its last re-

sponse that the United States deposit about \$24 billion with Algeria as a guarantee for meeting the four conditions set by the Iranian Majlis (parliament) for the release of the Americans.

Iranian View

nomic reforms begun in the sum-mer], then it is in the party where Washington rejected this as un-reasonable. U.S. officials described one should build barriers to guard against a return of the old evils." their latest proposal as a reformu-lated offer designed as a comprethe reforms were already irreversihensive response to Iranian stateble, this seemed premature, the arments and concerns. But they also ticle said said the new offer did not differ in political life as one way to guaran-tee the survival of the reforms.

substance from the position stated in the opening rounds of the indi-rect negotiations in November and December. The Iranian view is that while

the U.S. responses have been acceptable to a large extent, the United States must make the multibillion-dollar deposit as a guaran-tee before the hostages will be relessed

The United States has said it would free \$5.5 billion in blocked Iranian funds at the same time as the hostages are freed. The U.S. has also offered to fa-

cilitate Iran's effort in court to ob-(Continued on Page 2, Col. 3)

Sinatra and His Friends

Frank Sinatra, who has had an off-and-on role as friend to presidents for 20 years, is re-establishing a relationship with the White House. But his friendship with Ronald Reagan is not the only thing that is putting the performer back into the news. A book, based on interviews with an admitted Mafioso raises once again reports that there are links between the entertainer and organized crime. Page 3.

WEEKEND

Hidden Treasures of Bangkok

Some treasures of the old and charming Bangkok still exist, but most are hidden in unexpected places, oblivious to the bectic pace of the city that sometimes seems, today, to belong to another world. Jim Thompson's house is one of those treasures. Page 5W.

The capital of the south is Juba, and for eight years the southern legislators in Juba have done more squabbling than good. However, because the civil war has not broken out again, the south's semiautonomy is seen as a-Now Gen. Nimeiri wants to carve out five

more semiantonomous regions in the next two years. "Each region will have as much independence from the central government as a state does in the United States," said an enthmsiastic deputy minister in Khartoum. The plan, though, is not without its opponents.

Coup Attempts

"It is too soon, too fast," said El-Fatch el-Tigani, permanent undersecretary in the Information Ministry: Mr. Tigani said be felt there must be more education and development in outlying regions before the people are told to tackle their own affairs.

Dissolving local political dissension has been a major goal for Gen. Nimeiri since 1977.

north that is really a turnstile to the Middle East, has a president who has gone after recon-By that time he had survived several coup attempts, the closest shave having occurred in July, 1976, the day his plane landed early at Khartoum. One of the principal plotters in that try was Sadiq al-Mahdi, a descendant of Mohammed Ahmed, who wrested the Sudan ciliation and unity with extraordinary zeal. He recently announced a policy of decentralization that Western diplomats see as courageous. The process was born of necessity in 1972, a year after the president was first elected. (He from British and Egyptian control in 1881, and the head of the Mahdist movement today. In had assumed power in a military coup in 1969.) Gen. Nimeri settled a 17-year civil war between the largely Moslem north and the 1977. Gen. Nimeiri announced a general amnesty, released 1,200 political prisoners and invited back all exiles. Among those who re-turned was Sadiq al-Mahdi. Since then he has Christian and animist south. Five million southemers were given considerable autonoserved in several government offices. The cenmy, with their own elected 110-member assemtral government is fairly packed today with figures who at one time opposed the president."

> But by extending his come-one, come-all policy to the provinces, in the form of semian-tonomy, it is widely held that Gen. Nimeiri is gambling dangerously.

A Sudanese journalist remarked that the president "will only bring himself grief by de-centralizing too early. We already have the south complaining constantly, and rightly I think, that they do not get the services that the north has. We can only be thankful that they bicker so much among themselves that no one has suggested they march against Khartoum."

The journalist asked, "Who is to say that when these other regions get their public as-semblies and their governors it will not turn into one secessionist fire after another? Then we will have chaos everywhere."

But a source close to the president insisted that "his instincts are right. He is not talking about participatory democracy. He is talking about bringing more people into the management of this country."

By Gregory Jaynes New York Times Service KHARTOUM, Sudan --- Last year, just after the U.S. attempt to rescue the hostages in Iranhad failed, there was a state dinner in Khartoum, one of those stiff affairs at which ministers customarily speak grandly of national achievements to come and the diplomatic corps expresses every confidence that the will of the ministers will be done. However, the events in Iran soon consumed the conversation, and the ballroom was still stuck on that bly. The assembly elects a president of its high executive council; he appoints 14 members to subject when a deputy minister under Presihis Cabinet

recall:

American listeners. Then he said wistfully, "I remember when we tried to kill His Excellency in 1976." He told of the meticulous planning that went into the attempt to assassinate Gen. Nimeiri and bow it had been foiled when a tailwind set the president's plane down at Khartoum airport 30 minutes early.

Polygiot Nation

The president was not present, but many of his stannebest supporters were - and none was particularly shocked. To anyone who follows African affairs, the first astonishing thing about this anecdote is that a man who plotted to kill the president has a scat in the president's government; the second is the candor of the remark. Coup-conscious heads of state are not known for their ability to forgive. In Gen. Nimeiri's case, it is the source of his renown.

Sudan, the largest nation in Africa and as disparate in cultures and topography as any. with 1,009 spoken languages, a vast southern region that is really Central Africa and a vaster

Page 2 **Aspin Report Asserts Poland Is in Danger**

Democrat Sees Very High Chance That Russia Is Planning to Invade

By Michael Getler

Washington Post Service WASHINGTON — Although Americans are "breathing more easily about Poland" as the prospect of Soviet military intervention appears to be receding, the chair-man of the House Intelligence Oversight subcommittee argues that "the real danger" is "just about to begin."

In a report published Friday en-titled "The Worst is Yet to Come," Rep. Les Aspin, D-Wis., asserts that "the chances of a Soviet invasion are very high."

Contrary to many intelligence and press reports that suggested the Soviet Union had completed preparations to invade early in December, Rep. Aspin claims "there is strong evidence" Moscow was not fully ready then militarily or politically and that the real danger will come from mid-January to the end of March.

Rep. Aspin, whose committee has been studying the U.S. intelli-gence community's ability to fore-cast invasions such as those in 1968 in Czechoslovakia and Afghanistan in 1979, says this early forecast of readiness for a possible intervention early in December "may be another case of the common intelligence failure of mirrorimaging - assuming that others are like us."

'Precise and Plodding'

The United States, he argues, puts great emphasis on the "fire-fighter approach" where speed is important. "The Soviets give much greater weight to advance preparadon." The Soviet military, he said, "is both precise and plodding." As in the cases of Czechoslovakia and Afghanistan, its procedures require six months for an invasion of this kind, he said, and that preparation time will oot be up until mid-January.

Though the Kremlin probably still has not made up its mind to intervene, Rep. Aspin says the "odds strongly favor an invasion," and he cites three reasons

First is what he calls "bureau cratic momentum," meaning that so much work has gone into preparations and so many careers are ou the line that bureaucrats may feel they must "use or lose" the January-March period, after which spring rains and other factors will make it hard to keep the current forces in place.

There are undoubtedly Kremlin officials worried about "taking the heat" if Poland blows up after this time and the troops are out of position, he says,

Furthermore, be adds, "On no other occasion of which we are

Czechoslovak Officials See No Intervention in Poland

> By David Binder room and told the workers they

aware have the Soviets failed to use the mobilized forces at their command after such massive prepanations

Rep. Aspin also says Poland's Communist Party leader, Stanislaw Kania, faces opponents within his own party who would like to see a Soviet intervention sweep him from power.

On the military side, Rep. Aspin essentially argues that Moscow's "checklist" of preparations is long-er than some other U.S. analysts believe

Czechoslovakian intelligence officers trained in the Soviet system, Rep. Aspin reports, said it took six months of preparation to invade their country and insist that is the standard time. Measured from mid-July, when Polish labor unrest began, this would mean mid-January would be the start of the danger period.

Though Rep. Aspin did not say so publicly, it is known that one factor behind his analysis is the Soviet tendency to exercise its en-That process, some sources be-

lieve, is not yet completed. against Ir. There are more than two dozen Soviet divisions in six separate ar-While In mies and on five different fronts surrounding Poland. Soviet officers have exercised each division and each army, and the overall So-viet commander has visited each of those major commands.

But in the case of Czechoslova-

kia, Soviet military leaders report-edly also had coordinated exercises of entire fronts before actually attacking. Since early December, and the initial public U.S. warnings, the Russians reportedly have begun exercising these entire fronts and are nearing completion of these various communications and readiness tests.

Rep. Aspin argues that an inva-sion after March would be tough because spring mud would bog down tank forces and also because of the peculiar Soviet style of mobilization

Allen Says Meeting Crucial

WASHINGTON (UPI) - Richard Allen, Ronald Reagan's national security adviser, says the up-coming Communist Party Con-gress in Moscow is likely to be a remains, then took them away in watershed in whether Soviet forces invade Poland.

Mr. Allen told ABC News Thursday night that what would move Soviet leaders at the February meeting to decide to invade trol would be "a fundamental threat to the institutional dominance of the Communist Party."

C

Algerian envoys Rehda Malek, left, and Abdelkarim Gheriaeh, front right, arrive at the Tehran airport Friday with the latest U.S. proposals to resolve the hostage situation. The man beside Mr. Malek was not identified. The United States has given the Iranians until Jan. 16 to respond.

Algerians Give U.S. Proposals to Iran

(Continued from Page 1) tain assets left by the late shah and tire invasion force before using it. to set up an international procedure to handle the legal claims against Iran that Tehran wants

While Iranian leaders have insisted that they will not moderate their terms, and also threatened to put the bostages on trial if the demands are oot met, one Cabinet minister has said Iran will consider U.S. counterproposals to the guar-

antee demands. U.S. officials have predicted that the domestic power struggle in Iran between Islamic fundamentaiists and centrists associated with President Abolhassan Bani-Sadr would prevent an early agreement with Washington.

Western diplomats here said they believe that at some stage last month the Iranians drastically raised their demands to include the \$24 billion in guarantees and thus

dashed hopes of a release by Christmas. Exactly how this occurred and

for what motives is still a mystery. U.S. officials said they think Ira-

nian leaders are desperate for a so-lotion to the hostage issue, and that the leaders regard it as irrelevant when the country faces more pressing problems, particularly the war with Iraq.

Referring to the war, which is now in its fourth month, Ayatollah Mohammed Beheshti, the head of Iran's Supreme Court, asked Fri-

day why the armed forces had not launched their much-heralded offensive to drive Iraqis from the strips of border territories that they hold.

His comments at a prayer meeting at Tehran University were a veiled taunt against President Bani-Sadr, who has been saying for some weeks that the war is turning in Iran's favor.

Official communiques show the fighting is static and the level of combat light, partly because of winter rains.

Mr. Bani-Sadr has increased his national popularity through his frequent trips to the war front but faces the danger of a credibility problem if the stalemate contin

Jordan Says

Execute 200 The Associated Press

AMMAN, Jordan - Jordan's official news agency claimed Friday that Syrian security forces massacred 200 people in the northern Syrian city of Aleppo for allegedly helping anti-government Moslem Brotherhood gnertillas. A Syrian official called the report "ridico-

The news agency quoted tra-velers arriving in Jordan from Syria as saying the mass execution took place in Aleppo's public square, Masharka, last week.

The agency said the victims of the "dreadful Masharka massacre" were shot after being rounded up by units from Syna's "special forces" and "defense regiments."

Both forces are headed by Col. Rifaat al-Assad, the younger brother of Syria's president, Hafez al-Assad, whose pro-Moscow Ba'ath Party has been the main target of Brotherhood attacks. A senior Syrian official who asked oot to be identified said in Damascus the Jordanian report was "so ridiculous that it is not even worth comment." He contended the report was part of a Jordanian campaign "to spoil the reputation of our armed forces" and divert attentioo from Syrian military action in defense of Palestinian guerrilla bases in southern Lebanon. Syrian jet fighters scrambled over southern Lebanon to intercept attacking Israeli warplanes Wednesday and two Syrian planes were shot down. Damasens claimed its fighters downed two Is-racli planes, but Israel denied any

Japanese Premier's Visit Raise Fears of Violence in Indonesia

By Pamela G. Hollie New York Tunes Service

JAKARTA - The coming visit of the Japanese premier is causing concern here about the possibility of violent demonstrations.

The fears arose following recent anti-Chinese rioting in central Java. Ethnic Chinese residents in this country have long been a target of Indonesian anger over coonomic frustrations, and since the Japanese represent an extension of alien economic influence, it is thought possible that Premier Zenko Suzuki's visit may touch off anti-Japanese outbreaks.

The 1974 visit of Premier Ka-kuei Tanaka of Japan set off two days of disorders in which 11 per-sons were killed, a large supermarket was burned and more than 800 people were arrested.

Security Not Disclosed

The Japanese Embassy has not disclosed what security measures will be taken during Mr. Suznki's three-day visit, beginning Jan. 10, during his tour of the five mem-bers of the Association of Southcast Asian Nations.

It seems to take very little to set off noting in this country. Rumors about a 29-year-old Indonesian servant who died in the home of her Chinese employer led to not-ing in several cities last April in which several hundred Chinese shops and houses were damaged. And any illusions that anti-Chi-

nese sentiment was under control were dashed last month when the son of a wealthy Chinese businessman reportedly got into a fight with an Indonesian student. Reports of the fight set off a threeday riot in the Chinese-dominated business district in Solo in central Java. The violence spread to the Java. The valence spread to the port of Semarang, and by Nov. 24 gangs surged through that city's shopping district, breaking the windows of Chinese-owned stores and burning factories and cars. Indonesian troops were unable to stop the violence, which contin-ued to spread, to Pekalongan and Kudus on the north coast of law

Kudus on the north coast of Java and to Magciang and Muntilan to the south.

Violence After Funeral

The funeral of two youths shot during the rioting in Semarang was followed by two more days of violence. Eight persons were killed and more than 600 were arrested. Because these nots spread so quickly, the Indonesian govern-

ment is convinced that they were instigated by groups seeking to undermine the government of President Subarto. The Indonesian security chief, Admiral Sudomo, has called the rioting "the begin-ning of an effort to utilize the incidents for a political purpose."

Resentment against the Chinese dates back more than a century to the Datch colonial government, which made an economic distinction between Indonesians and the Chinese. Wedged between the

Maputo Pardons 600

The Associated Press MAPUTO, Mozambique - The government has pardoned 600 former soldiers, many of them blacks who fought in the Portuguese colo-nial army, who had been held in re-education camps since inde-pendence in 1975, the Maputo radio announced on New Year's Day. (Continued from Page 1) supply them with what in the Unit-ed States would be considered per-sonal items. When an American correspondent hired a driver, he was surprised that the driver began his employment by asking for an umbrella and thermosifor the office car. "On a rainy day, I will bring my own umbrella from home," the driver said. "But after I get to the office, I should not be expected to Jordan and Syria have been locked in a war of words over Syrhave to use it." New York Times Service PRAGUE - Czechoslovak officials acknowledge that their government's reactioo to developments in oeighboring Poland has been conditioned in part by the crisis of 1968, when the wavering leadership of Alexander Dubcek created a situation that finally led to invasion by Soviet-bloc forces. In interviews this week, the officials said they did not expect a military interventioo in Poland at this time, since the crisis atmosphere appears to have cooled. Some Czechoslovak divisions were mobilized early this month to join Sovict forces for a possible move.

With respect to the Czechoslo vak experience from March to August of 1968, during which Mr. Dubcek led Czechoslovakia's Communist Party along a path toward Western forms of democracy, including a free press, the Pra-gue officials pointed out that 10 years ago Mr. Dubcek's successor, Gustav Husak, issued a "basic document" analyzing the mistakes that led to the Soviet-bloc invasion

of Aug. 20-21, 1968. That document was commemo-rated by the Husak leadership last week in a press commentary by Vasil Bilak, a party secretary who was Mr. Dubcek's chief opponent 12 years ago.

A high official, who requested that his name not be used and that he not be quoted directly, said the to-year-old document would have been mentioned in the press any-way, even if there had been no crisis in Poland, because it was essential to the political course pursued by the Husak leadership. But the official remarked that

the Bilak commentary obviously had special significance, even though it made no direct reference to Poland, as a statement of Czechoslovakia's attitude.

Czechoslovakia could oot, of course, interfere directly in the Polish crisis, the official continued, nor was it appropriate to make what he called a "mechanical comparison" between the situation in Czechoslovakia 13 years ago and the situation in Poland today. In 1968, it is noted, Czechoslovakia's workers stood aside while intellectuals and party leaders strove to create what one leading Commu-nist of the day called "Socialism with a buman face."

Poland's crisis, by contrast, the Czechoslovaks say, has been characterized by workers' protest actions. There has been some spillover from Poland's worker unrest in Czechoslovak factories during the last few mooths, the Prague officials remarked.

Palau Islands In Pacific Get Independence

United Press International

KOROR, Belan - The Palau Is-lands in the western Pacific, scene of bloody World War II battles, have become the world's oewest independent nation.

The oew year ushered in the establishment of the Republic of Belau composed of islands situated 500 miles east of the Philippines. For U.S. veterans of World War II, the islands hold memories of tough battles against the Japanese. Formal independence paves the way for the removal by mid-1981 of a trusteeship agreement under which the United States has ruled the islands for 30 years. The United States will continue

station Friday. The movement de-manded the withdrawal of French forces from the island. to provide funds for the islands, with \$250 million earmarked over a period ending in 1995.

Pretoria Punishes Black Labor Leaders

cessive orders.

By Joseph Lelyveld New York Times Service JOHANNESBURG — The South African government showed its concern this week over the tendency of hlack trade unions to

take strong political stands by placing strict "banning" orders on two leaders of a journalists union that had just resolved a two-month dispute with the major Englishlanguage newspaper groups. The union, the Media Workers

Association of South Africa, has a wholly nonwhite membership ----Indians and persons of mixed race in the union identify themselves as hlack as a matter of principal in reaction to what they see as the government's tactic of setting different ethnic groups against each other. From the start the union has maintained that it seeks not only improved status and wages for hlack journalists but also a voice in shaping the way racial issues are presented in the South African press.

The banniog orders, issued under the Internal Security Act, mean that Zwelakhe Sisulu, the union's president, and Marimuthu Subramoney, the secretary of its branch in Natal, will not be able to enter a newspaper office, educa-Io a printing plant, for example, tional institution or industrial

There is no consensus among either Democrats or Republicans on what to do, although virtually all members would oppose another tax increase.

The heart of the financing prob-lem is that over the next 40 years the ratio of workers to retirees will decline from about 3.3 to 1 to about 2 to 1.

At the present tax rates the revenues paid into the old-age trust fund would be insufficient to pay for prospective benefits. "There are only two things to do," a Re-publican congressional aide said, raise taxes or cut benefits."

some contend that the situation may be inflamed if the problem is discussed in such bold politically unpalatable terms.

Canada's Northwest Is Breeding Ground Professors For Cold Air Masses That Stab Into U.S. Detained by

By Andrew H. Malcolm

New York Times Service YELLOWKNIFE, Northwest Territories - North America's winter starts way up here.

And if present temperatures in these parts are any dication, the cold snap that hit much of the United States at the end of December is just the beginning of a long and very cold winter.

This week it was warmer here in the capital of Canada's Northwest Territories: the thermometer crept up to about 40 below zero. But that was still cold enough to knock ont electric power in at least one major community, where water and sewage pipes and people began freezing within hours, and power inemen spent the night shinying up utility poles by the cerie green rays of the Northern Lights.

Typically, these cold high pressure zones (U.S. weather forecasters always call them "cold Arctic air masses"), such as the one growing here now, squat over northern Canada for days, building pressures higher and higher and making temperatures go lower and lower. Rising up to 10 miles in the air, the bitter cold domes eventually collapse on themselves, squirting long streams of icy fingers and fronts toward the south and east.

There, they clash with warm southern air, igniting chains of storms that barrel in off the Great Lakes, newly laden with tons of warm moisture, to dump more than two inches of snow an hour at times on parts of the United States.

Gigat Coffee Cup

Seen from above, these winter weather systems look like some giant continental coffee cap with white storms -- some of them 150 miles long -- swirling about like milk being stirred in. "Humans think on too small a scale," said Michael Newark, a gov-emment meteorologist. "We are talking [about] cold air masses spread over thousands of miles, dragging dozens of storms in their wake all over North America and even down into Florida."

The weather brewing here, 1,000 miles above the U.S. border, has many effects on life throughout the United States. It can keep warm fronts farther south. It can lead them farther north. They can do battle over the Great Lakes or Plains and paralyze the nation's transporation system. Or Canada's cold air can slide under an Atlantic Coast warm air mass, as it did in February, 1969, freeze the rain as it falls through the cold strata and bury New York City in a recordbreaking blizzard.

U.S. Politicians Quietly Study Cuts in Social Security mouths open ready to yell rather employers and 8.7-million self-emthan with their minds open ready to think." Rep. Conable is the ployed people, Social Security has become a

Social Security headquarters in Baltimore.

A draft report by President-elect

"Canadians," Robert Morley, the British actor, Turk Junta once observed, "love to sit in the dark, trembling with fear at weather forecasts." But according to Mr. Newark, Canada is unfairly regarded as the birth-place of cold snaps with snow; Canada's northern air asses are actually too cold to carry snow. It is the United States' warmer air and moisture that temper

the bitter cold and set off the big snowstorms there. Canada's north, where average temperatures have begun to decline again after five decades of shight increases, is actually a desert, with most areas record-ing less than 10 inches of precipitation a year. There is less than five inches of snow here now; it comes m the fall and blows around for six months.

But with its vast, open spaces, its long nights free of blanketing clouds, its minimal winter hours of warming sunlight and its snow-covered expanse to reflect back what little beat does filter down, Canada's Arctic region is an ideal breeding ground for cold weather systems.

No Place for Comforts

It is also less than ideal for humans accustomed to modern conveniences. Overnight, rubber tires are frozen flat on one side. Fuel oil bills can reach \$250 a month. Auto exhausts create frozen fog that hangs over highways for hours. Accident victims trapped outdoors have been frozen solid within hours.

Many Arctic veterans tell the temperature by chimney smoke. A straight plume is about 30 below. A slanted plume is closer to 40 below. A swirled olume means "forget it."

The plumes were swirling recently in Rae, an Indi-an community of 1,700 about 60 miles northwest of here. The Dogrib tribe was gathering for its annual year-end feast and weddings at 4 p.m. when the lights went dut in one end of town. After five hours of work, electricity was restored - for a few minutes.

Then, with all the furnaces, Christmas lights, stoves and other appliances drawing too much power, the main transformer gave out. From the sky Rac was erased from the landscape. A visitor asked how long the power would be off. "Too long," said Dan Marion, an Arctic veteran.

By midnight, homes without wood stoves were chilled. Children, whose ancestors spent entire life-

ANKARA — In their anti-terror drive, martial law authorities have detained the president and nine members of the professorial staff of the Academy of Economic and Commercial Sciences in Adana, according to authoritative sources in that southern industrial center. This is the first sweep in aca-

demic circles since the armed forces seized power on Sept. 12 and has caused concern among Turkish intellectuals bere, whn recall the harsh crackdown on leftist intellegentsia during the military

intervention a decade ago. Security forces would give no reason for the detention of the academy staff members, which took place Dec. 24, except to say that it was part of "an important operation" and the details would be released shortly. Among those detained were academy president Mukremin Altinas and his deputy,

Congratulations

Sabahattin Degirmenci.

Meanwhile the head of state, Gen. Kenan Evren, delivered a message of congratulations Friday to the martial law commanders and the security forces for their "success" in the struggle against

anarchy. A recent communique from the martial law coordinating commit-tee said that nearly 30,000 terrorist suspects had been captured between Sept. 12 and Dec. 10. Most of these people were either known rightist or leftist radicals, student activists. Islamic militants or lead-

ers of the leftist labor union feder-

the payroll tax in addition to the

increase that took effect Thursday. For 1981, the tax paid by employ-ces and employers will be 6.65 per-

cent on the first \$29,700 of earn-

ings. In 1980 it was 6.13 percent on

Survivor Benefits

A more pressing if less difficult problem is finding additional money to pay old-age and survivor ben-efits in the 1980s. The old-age trust fund, which pays these benefits, could run out of money by the summer of 1982.

Social Security benefits are paid from three trust funds: the old age and survivors fund, the disability fund and the insurance fund."

By law, revenues from the payroll tax, which is paid by employers, employees and self-employed persons, go into the trust funds. Benefits can be paid only from the funds, and if the funds are empty, benefits cannot be paid.

Congress thought it had cured the short-term financing problems by passing legislation in 1977 that mandated several increases in the tax rate and the taxable wage base. Unforeseen problems have been caused by the economy. High unemployment has reduced the number of people paying taxes to the trust funds, and the acceleration in the inflation rate has driven up benefits. Old-age, survivor and disability benefits are increased each July by the percentage rise in the Consumer Price Index for the 12 months up to the preceding March. The cost-of-living increase

last July was 14.3 percent. Social Security specialists in the House and Senate would like the members to channel more money into the old-age trust fund in 1981. The most likely action would be the shifting of money from the disability benefits fund and possibly

United Press International

MOGADISHU, Somalia — Former Secretary of State Henry Kissinger held talks with President Mohammed Siad Barre and indicated the Reagan administration would act more energetically than President Carter had to curb Soviet advances in the Horn of

Africa, the Somali news agency said Friday. Mr. Kissinger then returned to Egypt to continue his unofficial diplomatic shuttle. He goes to Israel on Saturday.

Diplomatic sources in Egypt said the visit to Somalia, aimed at underscoring U.S. concern over Soviet moves in the Indian Ocean, was suggested by President Anwar Sadat. Mr. Kissinger in-terrrupted his Mideast itinerary to fly to Somalia from Egypt on Thursday.

Somalia has agreed to provide military facilities to the United States in exchange for military aid. But Congress, during Mr. Carter's sterm, appeared reluctant to implement the accord as long as Somali troops were fighting Sovict-backed Ethiopian troops in Ethiopia's contested Ogaden region.

governor and Mr. Sinatra had known each ather for many whom the California Crime Commission described in 1978 as one whose name "has been linked with years" and "see each other social-ly." Asked if he would call them organized crime for more than 30 years." Korshak has denied the friends, the spokesman replied, contentions On July 11, 1976, Mr. Reagan interrupted his presidential cam-paign to attend Mr. Sinatra's mar-

The friendship goes back more than 20 years, when both were in the entertainment world. In 1970, riage to Barbara Marx, his fourth Mr. Sinatra abandoned his long wife, in Rancho Mirage. No Fanfare, No Economics?

First Decisions for Reagan

The new Reagan administration won't issue a stirring declaration of economic emergency, and in a way it's a shame. We like the idea, put forth by Congressmen Jack Kemp and David Stockman, the budget directordesignate. Loud, certain trumpets would be a sure way to attract the nation's attention and help the new president win economic credibility. But if they are to call the public to battle, trumpets must have music to play.

So in that sense, Mr. Reagan is right to put off any declaration of emergency. There would be no point in it if he and his advisers have no clear economic policy to propose. Without that, fanfares can only frighten a public already much troubled by the economy. For all the campaign talk about economic policy, the Reagan forces apparently have not yet come up with one worth trumpets.

It was easy oo the stump to attack the luckless economics of the Carter administratioo. It is proving a more difficult and humbling task to put together an effective program of Reaganomics.

The president-elect is being lobbied by competing conservative wings. The first group, led by Rep. Kemp and Lewis Lehr-man, an influential New York businessman, are the ardent supply-siders. They want Mr. Reagan to cut taxes first and foremost; to

Events are not going to leave the Reagan

administration much time for debate and

study of economic policy. The questions roll-

ing toward it are going to be settled fast, one

way or the other - if oot deliberately by the

new administration, then by default. Within

a matter of weeks, policy will be fixed on a

course difficult to change. President-elect

Reagan and his advisers are currently preoc-

cupied with recruiting personnel. But they

will need, at the moment they step into the

White House, answers to three particularly

The first will probably be Chrysler, and

the Reagan administration's position on aid

to the automobile industry. Chrysler desper-

ately needs another \$400 million in federally

guaranteed loans. But federal approval will

be contingent on further concessions by the

United Auto Workers, requiring renegotia-

tion of the existing cootract. That takes time.

Both the company and the union are anxious

to get these loans approved before Inaugura-

tion Day, but that may not be possible. If

not, Mr. Reagan's first substantial decision,

as president, will be the survival of the

Chrysler Corp. Even if this round of loans

can be completed before Mr. Reagan arrives, the next application cannot be far behind.

The second question will probably concern

oil stocks. The industrial countries have ex-

ercised great restraint during the past three

months, and that's why the war between Iran

and Iraq has not caused another wild leap in

But that restraint

urgent questions.

ai) nri

hold tight on monetary policy second; and to reduce spending and ease costly environmental and safety regulations.

More traditional conservatives, such as crusty Arthur Burns, the former Federal Reserve chairman, and Donald Regan, the treasury secretary-designate, urge the president-elect to put his greatest effort into cutting spending to hold down the size of the federal deficit and to defuse inflationary expectations.

Considering the severity of inflation, the traditionalists have the better side of the debate. Reagan ought to be wary of committing the United States now to a general income tax cut for the next three years, per the Kemp-Roth proposal. And not even the traditionalists are prescribing another occessary ingredient of any serious anti-inflation effort: an incomes policy, to try to hold down excessive wage and price increases while longer-term policies take hold.

With three weeks left till inauguration, the Reagan administration has no grand economic scheme, only some vague plans to cut the growth of federal spending, cut taxes and prune regulations. It sounds less and less like trumpets and more and more like the second Carter administration.

sometime soon, perhaps around late January,

the oil companies - and the industrial coun-

tries' governments - will have to decide

whether to continue this rapid drain of their

stocks. The alternative is to start bidding

Mr. Reagan would be wise to lift all gaso-

line and crude oil price controls immediately,

on the day he takes office. Beyond that, his

administration will need to keep working

closely with the companies and with other

governments - pursuing an actively inter-

ventionist policy - to avoid panic. If the companies, and foreign governments, begin

to think that Mr. Reagan is merely going to

leave it all to the market, the market will re-

spond as it did in 1979, when prices doubled.

One immediate victim would be Mr.

Reagan's own hopes for declining inflation

The third of these questions concerns in-

terest rates, driven to extraordinary levels by

fears of higher inflation ahead. The lenders

and borrowers who make up the financial

markets believe that Mr. Reagan will cut tax-

es, but they do not believe that he will actually do much about spending. The most influ-ential forecasts in the financial world all as-

sume a federal deficit in 1981 as large as that

in 1980. They foresee little or no improve-

ment in inflation. If the Reagan administra-

tion can't act quickly to change that atmos-

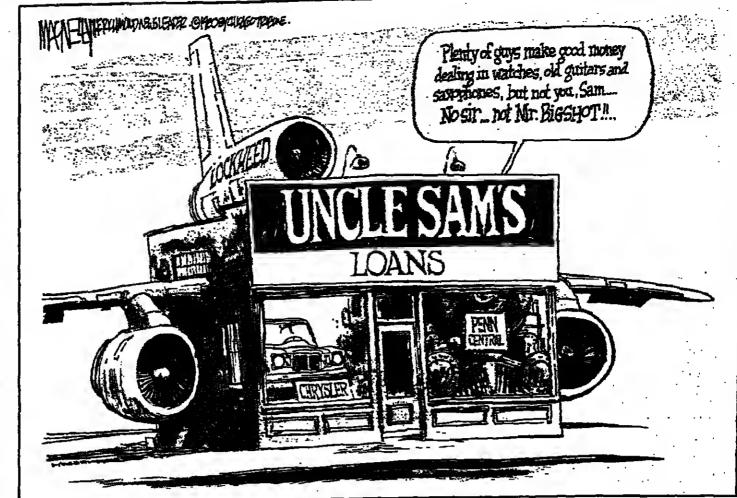

phere, the prospect for low and stable inter-

est rates will remain poor - with somber im-

and better economic growth.

against each other for foreign supplies.

THE NEW YORK TIMES.

Food and the Hungry: Revamping Aid

By Jonathan Power

ONDON - Orville Freeman, L a former U.S. agriculture secretary, startled a private seminar in Ottawa the other day by saying he thought there was a strong possi-bility of world grain prices "don-bling or tripling in the cext twelve months."

John Block, President-elect Reagan's nominee for agriculture, argued last week that a tightening food market gave the United States its "greatest weapoo" be-cause an increasing number of countries are becoming dependent on U.S. food.

The wast majority of those who follow the grain trade and its gyra-tions are sware that 1981, if harvests are poor, could be the year when food shortages, maintrition and even famine become widespread.

Food Chain

Food stocks have oow fallen to their lowest level since the bleak years of 1974-75, when food prices rose as fast as the suddenly rising price of oil. Then millions of peo-ple found food priced out of their reach and hundreds of thousands died from hanger and malnutri-

The United Nations Food and Agricultural Organization works on the rule of thumb that if cereal stocks fall below 13 percent of world consumption, the food chain starts to break. Shortages appear, the market goes haywire and distribution breaks down.

Although the world is at an apparently comfortable 17 percent, stocks are falling fast. Following the present trend, they will be down to around the 13-percent mark by the early summer.

The ocgative, self-serving

It is nei-ther feasible uor, in our jodgment, Carter administration to set aside 4 million toos of wheat it had necessary to track that food." bought up from the farmers in the This is a disturbing state of af-fairs. What is needed is a re-vamped program of food aid on the Sri Lankan model, directly tar-

wake of its Soviet grain embargo is not, despite some reports to the contrary, a contribution to such a reserve stock. It is more likely to be used to fulfill U.S. commitments to food aid.

Farmer Reserves

An earlier Carter administration decision to encourage farmerowned reserves, although a step in the right direction, still does not match the size of the problem. It is in principle an ideal way of uniting the interests of prosperous farmers with the needs of the developing countries, because it pays individual farmers to hold reserves for the international community. In practice, however, it is wanning. To be truly effective, it would oeed to take in 45 million tons of grain a year, rather than the present 20

If this were done, this would make an important contribution to building what the jargon calls "an internationally coordinated, but nationally controlled reserve," It would give a fillip to the discus-

International Opinion

Community in Disarray

Greece's accession to the European Community, which took place Thursday, will be welcomed by all pro-Europeans. Ironically enough, it may be welcomed even more by those anti-Europeans who believe that enlargement will inevitably lead to the fragmentation of the Community. Their belief is not that Greece, with its relatively small industrial and agricultural base, will of itself cause this, but that it is part of a process which, when extended to Spain, Portugal and even Turkey, will create a Community with interests so diverse that it will no longer hold together ...

The original common impetus of the Community, principally born of the 1939-45 war, is dying out. Greece joins a Community in disarray for which the final choice is whether to strengthen into political federation or to retreat into loose trade agreements. At the moment the latter outcome looks the more likely - unless the course of world events should impel a renewed sense of European fervor.

- From the Daily Telegraph (London).

Not-So-Happy Polish New Year

The Polish president's New Year message is that the situation in his country is likely to get worse. He is certainly right. The fact that the threat of Soviet intervention appears to have receded for the moment does not mean that anything has been solved. It means only that the Poles have been given time to tackle

their problems within the still ill-defined limits of Soviet tolerance.

The gravity of these problems is emphasized by having the president deliver the message. Normally the party leader speaks at the turn of the year but the party's authority is now too diminished for the task ...

The party is divided at all levels. Among the rank and file of the party there is seething restlessness... Pressures are building up within the new unions for faster and more radical action ...

Steering a course amid all these conflicts is going to be a formidably difficult task for Poland over the coming months. It will not be made any easier by the catastrophic state of the economy. — From The Times (London).

Difficult Balancing Act

It is natural for both Americans and their allies to hope that with new men in Washington 1981 will see them off to a new and more promising start. Yet the world situation which Mr. Reagan will inherit is deteriorating in various crucial respects ...

Meanwhile, the NATO countries are finding it hard to combine spending the extra money on arms needed for restoring the military balance with the Communist bloc with the economic restraint required for the conquest of inflation. These problems will test the leadership qualities of America's new rulers to the full.

--- From the Daily Mail (London).

Seventy-Five Years Ago January 3, 1906

MOSCOW - All is quiet in the city and prices on the bourse have been very firm, despite the revolutionists' threats to continue their struggle. It is still impossible to obtain a reliable estimate of the casualties that occurred during the recent riots, which probably totaled around 3,000. One of the strike leaders claims that the principal holidays of the year are approaching and that the people of Russia are intensely keen on having money to expend during these holidays. Therefore the executive committee of the Workmen's Alliance ordered the Moscow rioters to resume work. This explanation would seem to signify simply that the Moscow workmen found striking and rioting did not "pay."

۲

Fifty Years Ago January 3, 1931

PANAMA CITY --- With surprising swiftness a tatterdemalion army early today overthrew the Panama government, taking President Florencio Harmodio Arosemena captive and announcing a provisional government under Dr. Harmodio Arias, prominent Panama lawyer. Nine persons are known to have been killed in street fighting including eight police and Hartwell Ayers, New York Sun correspondent, who received wounds in the back, hip and abdomen during the fracas in front of the presidential palace. While unrest from political and economic causes has been evident in Panama for some time, there was nothing to indicate that the country would be plunged into revolution with such suddenness.

sponse to this state of affairs would be for the food-rich countries to turn the situation to narrow political advantage. The posi-tive response would be to decide that reform of the international grain system is long overdue and that when hunger is at stake, one doesn't play politica.

There are at least two things the world community quickly needs to sort out before the next food squeeze. First, it oceds to re-target its food aid exclusively to the hungry. Second, it needs to establish a world food stock to be released on the commercial market in times of shortage.

Sri Lankan Model

Food aid is justifiably coming under wide attack at the moment. The UN World Food Council observed in a recent report, "Only one-third of food aid is specifically earmarked to feed the malnourished. The rest is sold commercially and its impact on the hungry is hard to trace."

Robert Chase, deputy director of the U.S. Food for Peace program, asked to comment on this type of criticism, said: "It is not our intention that our food should go to the poor. Essentially the food goes into the pool of food re-

as recent and as fundamental as Watergate? Yes, it is - or so one must conclude from some of the comments being made in defense of Alexander Haig Jr. as a choice for secretary of state.

A particularly striking example was a piece by Norman Podhoretz, editor of Commentary magazine. Writing in The New York Times. Mr. Podhoretz scoffed at the notion that there could be serious questions about Gen. Haig's role as the chief defender of President Nixon in the last year of Water-gate. Then Mr. Podhoretz wrote:

"As for the firing of Archibald Cox as Watergate special prosecu-tor, it is difficult to see what this is supposed to prove. Richard Nixon

as president certainly had a legal right to fire Cox. Thus, in making sure that the order was executed, Gen. Haig as White House chief of staff was not only acting properly but also demonstrating loyalty to his superior — a quality that those who raise this objection do not seem to understand might be con-

sidered a virtue." That was Gen. Haig's line at the time, He told Attorney General Elbot Richardson that, with the world in a sensitive state, Mr. Richardson owed it to his presi-dent to stay on the team. When

OAU seems bent on drawing up

with relatively little fuss, the coverup would very likely have worked. Perhaps Norman Podhoretz, with the zeal of the conservative convert, regretted the fuss even then. In any event, he tells us now that loyalty to a superior was more important than concern about official ctimes. Watergate illuminated a good many things in U.S. national life:

the danger of secrecy, the opportunics for abuse of power in the White House, the importance of character in office. But one of its central teachings was surely that officials in the United States ultimately owe a deeper loyalty to the Constitution than to any presideat

And it is not only a point for the United States, not by any means. Other societies have found in searing experience that safety and humanity require those who hold office to put some principles ahead of loyalty to superior orders.

After the Nazi years, logal phi-losphers pondered what German judges should have done. Should they have enforced what bore the superficial indicia of "laws" — legal language, passage by the legis-lature — but were in fact bestial affronts to the very idea of law in a civilized society? Could they be judges and carry out such laws? Could they be judges and refuse to

Hard Questions

Those are hard questions. In an organized society everyone who holds office is not at liberty to decide for himself what commands he will carry out. Order has its claims. But there are limits. Loyalty to one's superior is not the altimate value. And that, at least, the

Ruckelshaus were right to quit more highly prized in military life. rather than carry out orders that, But that only raises a basic queswhatever their legality, were manition about President-elect festly designed to cover up miscon-duct. If Geu. Haig's efforts had prevailed, if Mr. Cox and his in-Reagan's choice for his secretary of state: Is it wise, for the world and for us, to have in that office a vestigation had been suppressed man whose every atom is military? Mr. Podhoretz, questioning the good faith of Gen. Haig's critics, suggested that their talk of Watergate --- or of his role in intensifying the war in Indochina -- was just a cover. They really opposed

from Watergate.

Of course Alexander Haig is a

execution of orders is a quality

Gen. Haig as secretary of state, he argued, "because they disagree with his ideas about the Soviet Union." That is, Gen. Haig is alive to the dangers of growing Soviet mili-tary power and determined to replace detente with "a policy in-volving reciprocity and strength."

Was Gen. Haig, then, the only possible Reagan secretary of state who would be known for a deep concern about Soviet power? Of course not. Would Gen. Haig's critics have reacted as adversely to other choices? I know I would not. The idea that Gen. Haig's views on the Soviet Union underlie the criticism of him would in fact be comic in its preposterousness if there

were not a nastier element in it. Several far-right commentators have sounded the theme that critics really object to Gen. Haig's firm Soviet line. In their charge I hear echoes of that old refrain "soft on Communism." One or two have even warned senators that opposition to Gen. Haig may arouse a public backlash. They come close to suggesting that op-posing Alexander Haig for secre-tary of state is impationic.

The conspiracy theorists would do better to consider the possibility that some people still take the lessons of Watergate seriously. The notion that a military figure deeply involved in the defense and pardon of Richard Nixon is beyond question as a choice for secretary of state is insulting to Ronald Reagan

and to the country. 01980, The New York Thmes.

The difference s Like millions of other Americans, the couple which overwhelms is long been part of the video revolution. So, the true perpleting stead of going to the movies, the movies have such rulers manage to them. BALLET?-

minie and for so my They are the owners of an RCA video disk so long Other despatchine that cost less than \$500. It attaches to ; a retiral arswer us antenna terminals of their color television Lao, in the human and

set. To "play" a movie on it, they turn the dial to an unused channel, slide a phonograph-sized disk into the machine and play.

They buy their movies at the same shopping mall store where they buy their books and re-cords. A disk for a newly released movie, such as "The Return of Darth Vader's Grandson," costs \$19.95, about the same price as they pay for the increasingly occasional book they buy. And, given the price of sitters and parking plus gasoline and admission costs, they regard a

\$19.95 disk as an excellent buy. The couple, whose disk machine is a descen-dant of today's Sony Betamax, can remember a time in the not-too-distant past when first-run films such as "Dath Vader's Grandson" were first shown at theaters that drew crowds eager to pay for the privilege of being the first to see them

to see them. But the increasing market among the middle class for disk and tape cassette versions of films soon impelled Hollywood to release disks and tapes simultaneously with the theatrical versions. As a result, in the 1990s, seeing films in theaters has become a treat reserved for the wealthy. The theaters are luxinious, and dimks and other amenities are part of the entertain-ment fore ment fare.

Like most of their contemporaries, the cou-ple actually prefers to see movies at home. There, using the controls on their video disk machine, they can stop the movie to savor a particular scene, turn it backward or skip for-ward over material that does not interest them.

this susceptibility to tinkering is particular-ly pertinent to the family's movie collection. Last Christmas, he, knowing his wife's interest in French and romance, gave her a boxed set of Claude Lelouch films, including "A Man and a Woman," whose ending she plays whenever she feels like having a good cry; and she — taking a cue from a magazine article listing 31 ways to restore magic to marriage — bought him a collection of pornographic films.

The video revolution, taking movies into the home, had the effect of "legitimizing" pomog-raphy by removing it from the arena of public concern to the realm of a private pursuit, like magazines with similar content. And while the

disks bought by the family still carry the ratings of the Motion Picture Association of America, the shift of mass movie-viewing from theaters to homes has produced its share of parental problems. Not long ago, the couple returned unexpectedly early from a neighbor's party to find their son chuckling over one of

those pornographic movies. Although home movie collections may have their problems, they also have their special joys. From the Disk-of-the-Month Club, the couple has assembled a library of film classics, including the complete works of the Marx Brothers. Over the years, though, their initial enthusiasm for the collection has waned; and from time to time, using his own videotape camera, he photographs his family and works the footage into Marx Brothers films.

The truth of the matter is that there are really few movies that the family cares to keep; and the smaller size of homes built as a result of soaring mortgage rates has limited the space available for storage.

As a result, the couple swaps movies with neighbors to bold down their space needs as well as their expenditures. And, from time to time, when the family budget is particularly pinched, one of the parents borrows a movie disk from the local library, particularly some of the movies remembered from yesteryear. New movies on disk or tape can be rented from concerns that diversified their business after auto rentals proved unprofitable.

But like most other middle-class Americans, the couple prefers to own; and they rarely take advantage of the opportunity to realize a few

dollars by selling the disks they seldom watch to one of the used-disk stores that sprang up in

to one of the used-disk stores that sprang up in the aftermath of the video revolution. As a former teacher turned dean, he is accus-tomed to new technology and is particularly proud because the trustees have allowed his college to buy (for \$2,000) a Japanese-made "high resolution" projection television for use in instruction. In contrast to the grainy look of conventional television, this equipment offers an image of filmlike quality, being four times as "dense" as normal. as "dense" as normal,

As an educator, he is aware that many youngsters have never seen film projected on a screen except on field trips to museums of technology, where they tend to be restless be-cause they are unaccustomed to watching mov-ies under circumstances where they cannot

start, stop and restart the action. Their rest-lessness is compounded by having to watch the films while seated in a darkened room rather

PI

films while seated in a darkened room rather than sprawling in their homes. She likes to make use of disks as decor — not by actually using them as wall hangings but by persuading her thrifty spouse that he can give the interior of their home an occasion-al new look by investing in "video wallpaper." disks that emit cheerful images of restful landscapes. There are some people who dis-dein these home vistas of sea mountains and dain these home vistas of sea, mountains and sky as the visual equivalent of Muzak, but the couple appreciates the tranquility such disks offer. In addition, with air fares prohibitively high and the dollar a wizened vestige of its. once powerful self, the couple has given up all thoughts of travel abroad. But thanks to disks, they have been able to "visit" most of Europe and Asia and are thinking about exploring Australia part coupler. Australia next summer.

Occasionally, a mood of reminiscence or a question from one of their children will remind the couple of the early days of the video era. Their son, who is thinking about becoming a lawyer, has heard of the so-called Betamax de cision of 1979, when courts opened the door to the video era by denying a challenge to the legality of using videotape recording to create film "libraries" for private enjoyment. Their daughter, who enjoys hearing her father talk about "olden times," asks him about some of the early disks, which have achieved considerable value as collector's items. He tells her that the first disks were put out by MCA, the parent company of Universal Pictures. Among the ent company of Universal Pictures. Among the first movies offered on disk were "Jaws," "The Sting" and "Animal House." They carried a retail price, on the average, of \$24,95 each (in 1980 dollars, of course), about half the price of prerecorded video cassettes of the same era, because disks were easier to make and duplicate.

He sometimes experiences a pang of re-morse for his failure to capitalize on the new technology by investing in it the \$10,000 he received as a legacy. Initially, large profits were made by equipment manufacturers; but (Continued on Page 6W)

ve been considered for in London. The ances of being asked to play Cleopatra were mote." When asked to do "Antony and copatra" for Stratford she was inevitably Tified. But I thought I must take that step Further is a terribly hard part because but have to do it all at the end. The arias are at $D_{i}^{(\mu)}$: end, by which interactions are at s end, by which time you're on your knees yway.

A member of the National Theatre in Lona during its brilliant salad days, Maggie nth gave a series of magical councy perfor-inces ranging from "The Recruiting Officer" Avenia Bunn in "Trelaway of the Wells." le also played a modern farce, Peter Shaffer's plack Comedy," back to back with "Miss Ja-Director Director de at Chichester, a feat nearly as dazzling as Director de areace Olivier following "Oedipus" with Durector de Critic." And she also played Desdemona

to Olivier's Othello, as well as Hodda Gabler and other rather serious ladies. Still comedy is what she is known for:

Someone even described "Virginia" as staking her claim to be regarded as a serious actress." don't know what I can say to that," she says "Having done comedy I guess I'm identified with that more than with anything straight.

On her upcoming role in London: 'It makes me go hot and cold just to think about it.'

What I like is to mix it up and do it all togeth-er. Not every part is all serious — though I admit there's not much hamor to be drawn from Lady Macbeth." She played Lady Macbeth at Stratford.

Born in Oxford, Maggie Smith began in revne and was playing in a small London theater called the Watergate when Leonard Sillman signed her to "New Faces of 1956" on Broadway. Her first appearance in London's West End, in "The Stepmother," was her only thudding flop. "It didn't worry me at the time. When you start it's not so desperate, one's got a confidence of some kind, you think it will be all right if you know your lines.

-

"At the start you have nothing to lose. They're all rushing to see someone else." For some time they have all been rushing to

see her. The scrutiny to which she exposes her see ner. The scritting to which she exposes her work has led to suggestions that her playing is highly mannered: In days of less pasteurized acting the word style might have been used instead. As time goes on she becomes more and more aware that acting is a difficult thing to do. "It is a difficult thing to do," she says. It is also something she could not live without. Although she won an Oscar for her first ma-tor film whe in "The Prime of Miss Lean Bro-

jor film role in "The Prime of Miss Jcan Bro-die," films come as interludes between plays. She was in Paris to play the edgy complaisant wife in James Ivory's film of Jean Rhys' "Quartet" before going to London for "Virgin-ia" and will he scen shorthy in "Clash of Titans," written by her husband, Beverley Cross, which she filmed at Pinewood outside London. "It's about Persens and Andromeda. I play Thetis the sca goddess, up on Olympus with a lot of dry ice." After three months in "Virgin-ia" she will go to the Caribbean for another Agatha Christie picture with Peter Ustinov to play she cannot remember what part -- "A whacky English lady," she hazards logically cnough.

"I think films are totally baffling, it's desperately hard. When you're on stage you have the time to gather yourself together. If you have a performance that evening, you have the day to prepare. In filming, you have to he ready when they're ready. To have a film career you really have to want a film career. It's greedy to want both. I would choose the stage if I had to."

The best thing about the stage is rehearsing. "I have real pleasure rehearsing, working it out and getting it together. I find the pleasure is if it works — the big if." She often learns her parts by writing them ont, again and again. "It depends on how difficult they are. I

found it the only way to cope with 'Virginia.' Also, because my script turns out to be such a mess with all the things I write on it, I have to write it out another way. It's easier to learn Shakespeare than 'Virginia' because you have the iambic pentameter, you know there is a rhythm."

Virginia Woolf first came up briefly when Maggie Smith was filming "Travels with my Aunt" with George Cukor, who had known Virginia Woolf and thought she had been much misunderstood. The project to do Edna O'Brien's play took off with the late Kenneth Tynan "Tynan had started doing a profile of me and he'd read it because he was a friend of Edna's and he got the script to me."

She played "Virginia" 17 times last season at Stratford. "There were a lot of local people who I think were totally mystified. I think they thought they were in for a jolly evening."

Edna O'Brien is considered a feminist writer, and certain militants have made Virginia Woolf their figurehead. "It's not the way I see it," Maggie Smith says. "It's just about a woman who to me seems fascinating, who battled through life — she battles had to cope with and did not inflict on other people! I don't see how it can be used as feminist

What impressed Maggie Smith in Virginia Woolf's letters and journals was "her energy what she got through in a day is astounding and her affection for people."

The play is not biographical — "I think Ro-bin and Edna tried to get the essence of the woman, it can't be like her, that's impossible" -nor is it a hterary source.

"Someone asked with a sinking heart, Is there a lectern on stage? Another thing to make one plummet," Maggie Smith said.

Bangkok's Hidden Treasure

by Thomas Kamm

ANGKOK - Mucb of the charm that so enchanted visitors to Bangkok a \square few decades ago has vanished today, a victim of modernization and western-ization, two culture-devouring concepts that numed a city of tree-lined canals, seething alleys and graceful wooden houses into a frantic metropolis of high-rise offices and hotels, square, concrete shop-houses in glaring colors and constantly congested, noisy streets.

Some treasures of the former Bangkok still exist, but most are hidden in unexpected places, among unlikely surroundings, calm and serene, oblivious to the hectic pace of the city that seems to belong to another world.

Jim Thompson's house is one of those. A simple turn off one of Bangkok's main arteries brings one back — with a little imagination to the days when the capital was "the Venice of the East, when the klongs were not yet paved over, when the few streets resounded with the musical sound of jingling bicycle bells, when apartment houses were the exception and the city had a visual charm that is lacking today. That is the Bangkok that attracted Jim

Thompson when he first came here in 1945 as an intelligence agent for the Office of Strategic Studies, the predecessor of the Central Intellisence Agency, and returned to stay in 1947.

Twenty years later, on Easter Sunday of 1967, Jim Thompson disappeared while on a stroll in the jungled mountains of Malaysia's Cameron Highlands. A thorough search and the psychic powers of several mystics failed to turn up a single clue. The \$25,000 reward was left unclaimed, and Thompson was declared

dead in 1974, after the seven-year period re-guired by Thai law had elapsed. Did he simply get lost or have an accident? Was he kidnapped because of his publicized wealth? Did he voluntarily disappear for political reasons linked with his CIA past, the Viet-nam War or his friendship with Pridi Panyo-myong, the deposed premier of Thailand who sought refuge in China? His mysterious disap-pearance left behind a tangle of intrigue and peculation, and triggered a second Jim Thompson legend.

For in the years he lived in Thailand, Jim Thompson had already become a legendary figure, a man who in his early 40s, according to William Warren in his biography entitled "Jim Thompson; the Legendary American of Thai-land," "abruptly abandoned everything that land.' was familiar to him and moved into a world and a career as exotic as any novelist's creation.

Indeed, when Thompson returned to live in Thailand, after his discharge from the OSS, he became interested in the commercial possibilities of Thai silk, the shimmering fabric that once was a traditional handicraft but was then a dying industry, practiced only by a few famiies of weavers.

Thompson felt that it had greater possibilites, providing he could find a foreign market. Encouraged by the enthusiasm of Edua Wood-man Chase, the powerful editor of Vogue and arbiter of fashion, he founded the Thai Silk Company in 1948 with a small investment. The subsequent history of the silk industry is a classic success story. Today, Thai silk is one of the country's main export commodities.

But the first Jim Thompson legend does not rest entirely on his reviving a vanishing craft. It also rests on the house he built, a work of art in itself, and the fabrilous art collection it contains.

Thompson's taste for the old, unprogressive Bangkok is apparent in the location and archi-

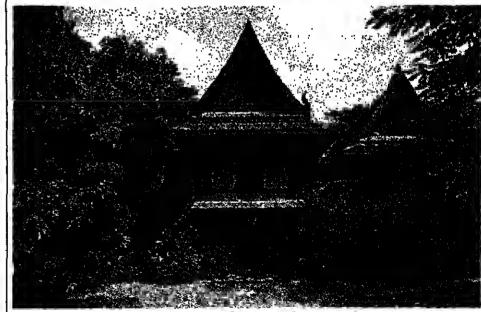

tecture of the house. Situated on a klong right across from the weavers' village of Bangkrua, it is protected from the noises of the city by luxuriant vegetation and large rain trees that arch over the water. The house, made of teak, is built in traditional Thai style, with airy, open rooms and steep roofs that seem to reach for the sky.

In fact, Thompson's house is put together from six old houses bought in various parts of the country, but assembled in such a harmomious fashion that they seem to have been

The other rooms and the terrace seem to grow out of the drawing room. To one side is the dining room, with its crystal chandelier and elaborately carved table — still set for six — that bears the insignia of King Chulalongkorn. The walls are lined with paintings that tell the tale of Prince Vessantara, who gave up all his possessions, including his wife and children, to attain enlightenment.

mellow grain of the teak lend great warmth.

Blue-and-white Ming and Thai porcelain is displayed on low tables or in wooden cases.

A house without a master since Jim Thompson disappeared.

conceived together. The main section, which Thompson made his drawing room and the kitchen, came from Bangkrua; the rest came from different parts of Ayuthaya Province, northwest of Bangkok.

One enters into a stairwell leading to the main floor. In traditional fashion the house is elevated, but the indoor stairway is a conces-sion to Western comfort; in a true Thai house it would be outside.

But that is one of the few concessions. Thompson even observed three semireligious ceremonies during the construction of his house, which was officially completed on April 3, 1959.

The main room in the house, and the most impressive, is the drawing room. Thompson re-versed the walls to show their delicate carvings and removed partitions that formerly separat ed it to make it one vast room. The years have given the floor and pillars a glearning patina. From the ceiling hangs a large crystal chande-lier from an old palace, and under it, in the middle of the room, is an ornately carved low bed, used to display a piece of Bencharong porcelain. On the bed, and on the couches and lacquered bamboo chairs are brilliant silk cushions in various shades of red, yellow and

Along the wall, on low carved tables or display cases, are pieces of porcelain, Burmese and Thai statues of Buddha and a wooden replica of a temple spire. An exceptionally fine U-Thong style (13th to 15th century) Buddha head sits on top of a painted cabinet. Carved figures of a Burmese spirit look down from niches ingeniously made from windows.

The room crudes a sense of grandeur, yet the harmony of the objects displayed and the

Across the hall is the Bencharong room, so called because it houses Thompson's extensive collection of Bencharong (which means "five colors" in Thai) porcelain. These colorful pieces, decorated mainly with floral designs, were made in China following Thai models between the 17th and 19th centuries.

To the other side is the study, with its collection of green Sawankalok pottery and ancient green-sandstone image of Buddha from the Dvaravati period (6th to 10th century), and a 17th-century French map of Thailand; it leads into the guest room.

To the right of the study, separated from the rest of the house by a carved wall that had once been the entrance door to a Chinese pawnshop, is Thompson's bedroom. It features another elaborately carved bed, a tiger skin on the floor, a painted Chinese screen of the Ming period and more traditional paintings. In corner stands a labyrinthlike house for pet mice.

A few years after he moved in, Thompson added a gallery to house a collection of paint-ings he discovered in the United States, depicting scenes of daily Thai life. They were commissioned and brought back to the United States in the 19th century by a missionary, J.H. Chandler. Thompson felt they belonged in their native country.

Throughout the house, all available space has been used to display a Buddha, a statue, a piece of porcelam or a painting. The softened light gives the Buddha heads an air of mysteri-ous screnity, the graceful architecture and warm teak background enhance the beauty of all the objects. "You have not only beautiful things," Somerset Maugham wrote Thompson after dining there once, "but what is rare you have arranged them with faultless taste."

Restaurant review

New Wave Californian Cuisine: A Marriage of Many and a Mime of None

by Patricia Wells

AN FRANCISCO - Nowhere in America is the spirit of culinary adventure more pronounced than in Califor-nia. This is, of course, the land of gastronomic abundance, the state that grows much of the nation's fresh fruits and vegeta-bles, fills us tables with fruity Zinlandel and clean white Chardonnay, and harvests fresh salmon, crab, cysters and abalone from nearby waters.

Responding to this bounty, there is a new breed of Californians - found in restaurants and houses, lood hostigaes and cooking distinct cuisine to call their own.

This rapidly emerging cooking style is a marriage of many crisines and a mine of point. It takes its lead from the French, both classic and nouvelle, and it borrows heavily from the generoasly spiced Mexican cuisine. In forma the generously speen metrican cusine. It is influenced by the oriental presence in Cali-forma, both Chinese and lapanese, and it shares with good vegetarian cooking a respect for the body and an understanding that healthy food doesn't just mean "health food."

But above all, the chisine generates an excitement about food, a sense of experiment tion, plus an uncompromising concern for-good food and good dining that seems to have been lost in much of America, where fast food, fake French and fern bar spinach salads are

shout as house as many menus get. In sampling California cuising, one is likely, to find an absence of red men, an arcent of so runn an apsence of red meat, an accent on gaine birds such as pigeon and quait, and for sample such new, yet native, combinations as a creany articlotte song spinkled with basel-nug, e wahut vinsignette with a rough of fresh ginger; yest served with a California prune charter, or they lady apples poached in runn cider.

... The new wave California cuisine is perhaps best personified by a little Berkeley restamant-called Cher Panisse (1517 Shattuck Ave., tels 545-5523). Here, in a restared two story house-not far from the University of California cam-gas, one limits fresh liening calight the day be-

fore in the San Francisco bay, plump-breasted California pigeon grilled over mesquite wood charcoal, as well as homemade fetticcine sauced with a delicate blend of fresh cream

and goat cherse. California pears share the plate with domes tic prosciutto, and bright red beets become the background for a salad dressed with chunky capers and a garlicky, parsley vinaigrette, Here, the all-American pecan pie is reincarnaled with a European flair - the rich not filling : is made with California almonds and the pastry is strictly French and light.

Chez Panisse is actually two restaurants: a newly opened cafe, which serves delitions, me usual salads, some, pizzas and a quarter of daily specials; and a more formal main floordining room, where the inventive four-course

table d'hote menn changes daily. The informal cale is simply and spussely decorated. The walls are white, and light col-ored wood booths give the room a roughedged, pizza parlor quality. The atmosphere is onzy and relaxed, with diners warned from the wood-burning pizzr oven in the center of the long and narrow upstains dimng noom. If the cafe served nothing but pizze, Chez Panisse would still be with a visit. Then deli-If the cale server pounds in a wait, then deli-cate pie made with the waith a wait. Then deli-cate pie made with characteles redefines the word pizza. It arrives thick crusted and firsh from the owen, as a refined melange to frish wild musticipate and grated Parmesan choose. The entries is distinctly Cher. Parises — an imaginative folded pizza filled with proscinite. goat choose ministratia and herbs, arriving th-solutely fresh and scanning. The restament's here of cooks, directed by Alice Waters, liss, a penchast for goat cheese, and doss issue its a benchast for goat cheese, and create salice to the signify tart, full-fla-vored cheese (The featureans with goat cheese and create salice is a brilliam idea, yet on the evening we antipled it, there was no much-freshipsing for the my plane, and, importantly index, like one delicate pasts turned into a sticky mass.

cooked, the once dencate pash turned mile a sticky mass. The calle science, sweat and mesty from cracked crait, and Pigeon Point oysters inucted in from the shelling hatchery in headby Pes-codero. Calif. The oysters are sweath and more delivere than American East Coast write-

ties, and less briny and full-flavored than French, but are equally appealing.

Daily specials were disappointing. The pollo riutico, a mixture of chicken, sausage, onioas, polatoes and hot peppers, was a bland and undistinguished stew, and the polenta, sauced with wild parcini mushrooms and Madeira, made no statement at all. Once served, the sauce chilled quickly and formed an unappetizing schim.

But desserts are well above the quality of any American restaurant that bills itself as a gate. The chocolate cake with creme chantilly could not have been fresher or fudgier; and the almond tart is the kind of dessert that will do much to spread the good name of California CINSIDE.

The main dining room is distinctly more formail with a \$25 fixed-price menu.served Tuesday through Saturday. Reservations must be made at least a week in advance and diners can select from a small but refreshing list of California vintages or can bring their own wine for x \$5.50 corkage fee. The small diving room, also stark white, is decorated with the me mix of wooden booths and art deco fixtures as the cafe, and makes a soncompetitive, yer comfortable backdrop for the main event the food ...

The mean we sampled was integinalive and well balanced, starting wilk a salad of fresh bering fillets maninated in a pungent mix of Jemon, sweet red peppers, capers, anahowies and olive oil Like much of the food in the new California wave, the dish was unselfconscionaby pretry, but not arranged as to death, as though presentation was all it had to offer. through presentation was all it had to offer. The second course, fresh pasta sanced with crabanest, was equally lovely to look at, but hulled in Sawor. The craft was too light and idelicate a partner for the subile pasta. Hut the pigeon, grilled to the perfect point of phileness overstal wood chanced was the cleast, and the wild stor served with flows the best we've ever eners. For ours, inc our was not oversocked to a much, and was thered. with a delicate red wincoind wild with flows the perfect of a much, and with flows. The crinchy almond art appratch again, at

At Greens the crowd is a mix.

did Chez Panisse's raspberry sorber; which tastes more like raspberries than raspberries.

Ask California food builts where to go next and they'll say Greens, (Building A, Fort Ma-son; tel: 771-6222) which by definition alone is about as unlikely a candidate as any for most favored San Francisco restaurant. Yet this Zen uddhist run vegetarian restaurant housed in a former army barracks has become just that. Greens succeeds where other vegetation res-frammers fail because the menu is inventive, the food succempromisingly fresh and the staff does not float about like the chosen few.

does not float about like the chosen few.
 And the view is summing. On a summy San Brancisco day the voluminous, white walled space at Greens takes on a quality of celebration, with blue skies and the sinuse red of the Golden Gate bridge (When one considers all the dreadth mains we have induced simply for the sake of dining with a view Grienes certainly descross hearty proset.)
 Gimt reduced scalprings by a San Francisco arise. The Blunk, help dill and warm the space as to be being in the same of an excitation of the bring bridge competence of the space arise. The Blunk, help dill and warm the space as to be being competential arrangements.
 The captured is a must would construct buries in Saidh shoemend down weak, space hades in Saidh shoemend down weak, space hades in the space of the spa

mink coats, elderly couples in for the daily dose of greens and even a jogger or two. Greens is run by a local Zen Buddhist group

with farms just north of San Francisco and a with farms just norm of sain Francisco and a bakery in town. Not surprisingly, salaris and breads are what they do best. For \$425, Greens offers a hearty and original spinach salad, prepared with tender leaves of spinach sprinkled with Greek kalamate offices. Califor-nia red onions, feta cheese and thick and crusty crontons. All is tossed in a delicate wi-

naignethe of hot olive oil and sherry yintgar. The restaurant is famous for its chill, a pleas-ant but underspiced mix of Mexican black ant but materspaces mut to whethat these beans, camin, chili peppers. Munster cheese and crowe frache. Other popular distins m-clade a Corgenzala open-faced sandwich (sourdough bread spread with a mitture of Gorgonzola and cream cheese, then thankal Gorgonzols and cream cheese, then changed grilled) served with winesap apples and wal-nots, and a lovely grilled brocheste of slegen bles, including maximized tota, or bean, cmd, threaded on a wooden alcover with misth-rooms, tomatoes, and peppers. Desterts are distinctly American, with a selection of calces that include poppe seed, banking, walnut and carnot. Prices are proferate, with a full most with wine priced at about \$12 per person. While there was filenty to rejuict-about on: these Bay Area restaurants, there was real day appointment in the most talked about new wave California style restaurant in Los Anne

Michael's. (1147 Third Street, tel: 451-0843) is a 11/2 year-old spot in Santa Monica run by a young American, Michael McCarty, He ro-stored a lovely old building into a comfortable contemporary setting touched with an under-stated elegance. Tables on the tree-shaded pa-tio are coveted, while those dining indoors and wooed by silver table settings by Christon and paintings by Jasper Johns and Data

Hockney. Michael's is known equally for snobbe and inventive cuisine. To the contrary, found the service superb, and while the me delivered its bit of invention, the food did in delivered its out of invention, the tool and Who would expect to be disappointed by salid of fresh Belgian endive and meted and cheese bathed in a walnut oil vinaigne What a wonderful idea. What a failure in reization. The chicory was faded, the goat cheer was old and acidic and the vinangrette w over wheirung.

Fresh pasta with a sauce of scallops, creat and fresh ruffles sounded inventive enough sample, but totally lacked definition, had but favor at all and no hint of truffles. And the thercoal-broiled saddle of lamb with red cat thancoal-broiled saddle of lamb with red case rants, basil and thyine sauce sounded like is perfectly. California dish. Unfortunately, whi it tasted like was lamb well on its way to bein inuttoin, and sauced with a flavorless melouge. An entree of California squab with a rasplere vangar sauce seemed a bit tritely nonvelle the fallowing (from Chez Panisse) the quality in California squab, we had high expectantial For once, we were not disappointed by flavor an fusiones. TRACES IN

What Video Is Doing to the Movies (Continued from Page 5W)

later the steady profits flowed to the manufacturers of "soltware" i.e., programming. He has enthralled his daughter with stories his mother told him of the glamorous Hollywood studios of the 1930s. From his own memory, he can recreate for her the time in the late 1970s and early 1980s when the studios, though reduced in glamour, began to transform themselves to accommodate the video revolution.

In 1979 and 1980, all of the studios organized video casselte operations to promote the sale of their films, and although dollar revenues were initially minuscule in comparison to those realized from theatrical release or sale to commercial television, studio executives were transfixed by the percentages. They had learned that video cassettes returned the highest profits per viewer of any means of film distribution, including subscription televisioo and pay-cable.

At that stage of development, futurists sketched a Hollywood in which the film studios evolved into something akin to recording studios. In fact, the early disks revealed some uncertainty about what sort of motion pictures people wanted to own and see again and again. In 1980, MCA's disks emphasized the high-fidelity sound of its laser-optical disk system,

which could be played through a home stereo. rather than the tinny speakers of most television sets. In addition to musicals like Para-mount's "Saturday Night Fever," MCA plans at that time included a Donnie and Marie Osmond special and other rock fare.

"We're looking for programming that will jump right off the shelf," said James Fiedler of MCA. The period was very like the late 1920s,

right after the introduction of sound in the Al Jolsoo triumph, "The Jazz Singer." For a while thereafter, Hollywood was infatuated with alltalking, all-singing, all-dancing revues, but what was at first novelty soon soon became a bore. By 1930, the revues were on their way to oblivion. But in the video revolution, as in the sound revolution, musicals were regarged as a safe introductory bet.

What the couple misses in new movies are the vivid, sharp-edged photography and the vast panoramic effects of those days of film. In fact, they have included in their collection of disks certain movies they cherish because of their photography --- among them Stanley Ku-hrick's "Barry Lyndon" and Terrence Malick's "Days of Heaven."

The couple knows that although both film

and videotape record moving images, the two media are vastly different. On motion picture film, images are recorded photographically 24 times per second. When the developed film is projected back at this speed, it produces the illusion of motion. In video systems light is directed electronically into shifting fields of dots that melt into a new image 30 times a second. These technical differences create the fundamental distinctions between the two media, giving film images their well known sharp-ness and clarity and giving video a fuzziness

Still, video has other compensations, and as early as 1980, Francis Coppola, the famous di-rector and producer, had announced that all his production would be on video within three

rensable, making it an attractive alternative to film, which had the drawhack of high silver cootent in an era of soaring metal prices. Video also offered advantages to those with the technical skill to manipulate its myriad dots. The introduction in the late 1970s of costly computerized editing systems allowed the dots from one image to be mixed with the dots of another, resulting in superimpositions, animations and fantasy sequences impossible on ordinary film.

Mr. Coppola, whose prowess as a movie maker was matched by his prescience, predicted in 1980 that movies would be created like elaborate long-playing records, not only with multiple backgrounds, but also by putting actors in juxtaposition with other visuals.

There's really an ongoing war between the ar-chitects and interior designers." Feeling, too, can be behind the definitions of designer and decorator. "Interior designers used to be called interior decorators, but there is a difference," Rense said. "Designers should be able to design a total concept — the space, the formiture, everything. Before it was a case of buying existing things and arranging them. A decorator primarily furnishes."

Who uses decorators? Not just the millio naires - nouveau or ancien, Rense averred. "There are the people who have always used them. We're an affluent country and there are more and more people who can afford them.".

And where better to choose than from the pages of America's decorators' Debrett? Which is why designers — American and En-ropean — court Rense with the assiduity of wasps around a golden honey pot.

"The Digest is for a certain sphere of peo-ple," said Jacques Guerard, the Frenchman who decorated the interior of the Hotel Grand-Bretagne, Athens; Boucheron, Geneva, and homes in London and Paris. He was explaining why he hoped to break into the magazine. "If one is looking for that rare international clientele, being in Architectural Digest lends one a certain anra."

Francois Catroux, another French decorator and a favorite of Rense (his work in New York, Europe and Mexico has often featured in Architectural Digest), called it a magazine of great prestige. "It's taken the place of Con-naissance des Arts internationally," he said. Catroux gets at least one top job after every Architectural Digest spread; for a Californian designed it one he as any as fine As Arbi designer, it can be as many as five. As Architectural Digest Paris correspondent, photogra-pher Pascal Hinous pointed out, "500,000 sub-scriptions can mean two million readers — an nternational public vaster than anything found in Europe."

"Submitting to Architectural Digest is the easiest thing in the world," Rense said. "Get-ting in is the most difficult." Out of 2,000 homes a year, only about 10 percent make it. Every one passes through her personal acruit w. "I think it is immersible that one percent do I think it is imperative that one person do the choosing," she said. Rense works from record shots sent in by

innate taste - a tradition America is too young to have."

So find yourself a top designer and get out our checkbook. For although Rense said that she never thinks about money and has shown inexpensive places, the average room shown by Architectural Digest costs about \$45,000 -

Even more nerve-wracking, a lot of money spent is no guarantee. "I reject million-dollar interiors weekly," she said. "It burts me, but all too often it's spent on militant bad taste."

So before uncapping your pen, peruse the pages of Architectural Digest to see what is in. One warning: Reading too many issues at once may give you visions of Japanese screens this may give you visions of Japanese screens this Christmas instead of sugar plums — Far East-ern exotica seems de rigueur from the plains of Spain to the Hollywood hills. Though Archi-tectural Digest, unlike some other decoration magazines, does not redo a house, photograohers arrive with more flowers than film and there are enough lities and orchids to open a flower farm. "They even had them in the bi-det," sighed a French woman whose chatcan was recently photographed.

Further clues to the Rense criteria can be found in November's Architectural Digest. Sally Sirkin Lewis' design for Rense's own house is featured on the cover and inside. Black entrance hall, beige sofas, beige satin four-poster and the obligatory oriental antiqui-

What to leave out of your sitting room and off your coffee table is easier to discover. "I hate the instant collection," Rense said. "Twe seen an awful lot of obelisks. Ostrich eggs were very big for a while — now who can fault an egg for design — but a lot of people just jumped on a trend." She hates garish colors, and though Architectural Digest has been run-

ning a lot of black, she is "so tired of it." Glass, chrome and plastic have given way to weed, lacquer and lacquered straw. "Tve had to ban Boston ferns and I won't show any en-dangered species — tiger skins or zebra hides." "Like an understated dress in a dramatic fabric," Lewis said of Rense's home - a per-fect example of the "minimal living" favored by Architectural Digest. "It's a growing under-standing of quality," Rense explained. "The picture wall with 18 pictures over the sofa is

ABCHITECTURAL DICEST

Buyers Cautious at English Auctions

by Souren Melikian

ONDON - The end-of-term reports released by the main English auction houses leave little doubt that the market has entered a new phase.

The art market

Spending is up in high-security zones, and only there. Sotheby's, leading with worldwide sales totaling £120,183,000 from Sept. 1 through Dec. 15, owes as much as one-sixth of this net turnover to jewelry. In this field, sales have increased by one-third over the corresponding period in 1979.

"Impressionist, Post-Impressionist and Con-temporary Art" — lumped together — take an-other large share, £15,840,000, improving the fall, 1979, score by more than a quarter.

Thumbing through the season's catalogs, it is easy to determine what sells well. Works must either be at the top of the list in the way of great Impressionist, pointillist, expressionist and other late 19th- and early 20th-century schools, or of the most typical and obvious kind. A Renoir portrait of a woman, sold in London on Dec. 3 for £580,000, is not the master's most unforgettable work, but it sums up all that Renoir was going in for in 1888: the lush nude, the broad brushwork blending colors along the outlines of his subject, the downcast, half-closed eyes and that ambiguous expression of the face seen three-quarters. In short, the Renoir look of the 1880-1890 dec-

Old masters have been doing well, along the same principles. Sales at Sotheby's, including paintings and drawings, boomed from £4.4 million in Sept.-Dec., 1979, to £7.8 million this fall. By and large, however, buyers are not tak-ing chances. They go after signed works by well-known masters, preferably illustrated in art volumes. Seven auction records were estab-lished on Dec. 10 at Sotheby's, including £467,000 for a painting by Pieter Bruegel the Younger called "The Payment of the Tax at Bethlehem."

But two days later a patchy pattern could be observed at Christie's Old Master sale. Hoge prices were paid for unsigned Caravaggiesque paintings in very bad condition. One, identi-fied as "Christ and the Woman Taken in Adultery" by Mattia Preti, must have been a handsome piece when it was painted, around 1600-10. In its present condition, however, it will need a lot of costly restoration work, making its £100,000 price seem very large indeed. Simi-larly, a fine outdoor scene by Philips Wouwerman, much exhibited, often illustrated and graced with a first-class pedigree, was brillianty sold at £111,500.

But there were some failures. A landscape by Salomon Ruysdael was bought in, possibly on account of its dirty-looking paint surface, which suggested wear. Another one, of considerable beauty, failed to sell, perhaps because the formula "signed with a monogram" chilled private buvers.

It all shows that while huying in this field is stimulated by the fear of high-level inflation, it remains unpredictable and is therefore more of

There are indications of an ominous charac ter to be read into the fall figures.

a gamble than a hedge against inflation. No buyer can be sure of getting his money back if he is not a thorough professional. The most striking progression at Sotheby's - Christie's did not release departmental tocludes everything from sculpture to gold boxes and musical instruments, are down by nearly 20 percent, without taking inflation into actals for the term - concerns Chinese works of count. So are "European Ceramics and Glass" and "Antiquities." That covers the great ma-jority of objets d'art, except silver which is, art, which were np by 150 percent thanks to the Chow sales in Hong Kong (IHT Nov. 26 and Dec. 15-16). That is consistent with other again, the object of intensive speculative huyfigures the world over. Rather than being an indication of general healthiness in the art market, however, the boom on Chinese largely

ing and is going up. In short, despite inflation, buying is any-

"Works of art," a loose category that in-

'Riding at the Herring,' by Philips Wouwerman.

reflects the wealth of Hong Kong and Japan with its strong ties to Chinese culture. The field, better studied than most, makes buyers secure and simulates speculative buying from professionals. It is highly significant that Col-naght's, best known for its old master paint-ings, has decided to open a Chinese and South East Asian section.

'One last winner this fall is North American art, totaling £7.5 million at Sotheby's, precisely twice last year's score. Again, this does not demonstrate the prosperity of the market in general but points to the nationwide surge of interest in the American past. It is linked with a search for roots, and an almost ecological yearning for things as they once were — from gramophones to movie posters of the 1930s. Such a phenomenon goes far beyond mere "art market" trends.

Of course it all adds up, accounting for the overall financial progression of Sotheby's, 26 percent, and Christie's, 18 percent. Yet this does not mean that the future is all roses and sunshine on the art market stricto sensu.

thing but reckless. It is targeted on two broad groups. The first consists of items that are po-tential buys for museum foundations — major paintings, Christie's Leonardo notebooks, etc.. The second group includes small, portable works of art, colorful enough to be of instant appeal and easy to authenticate and identify. Old silver, 18th-century snuff boxes, Faberge, all with marks or signatures, all easily datable; important miniatures, rare books, rare coins. But not porcelain: It is too breakable to be carried around and truly valuable only when superlative quality sends it back into the cate-gory of potential museum buys.

gory of potential muscum birys. A danger sign has just been flashed by Phil-lips, which has released its turnover figure from January through December. It stands at £32,800,000, nominally up by 6.4 percent, which actually means a drop of about 5 or 6 percent. The reason may be guessed. Phillips hardly handles the speculative end of the market - top old and modern masters, top jewelry, silver, etc. Its wares mostly fall outside the museum sphere, hence the decline.

Leaner times may well be nearing.

To the second se First so I decided to just shoot the exteriors.

designers or home owners, and from leads giv-en by photographers, designers and writers, then sees many of the first choices personally

before giving the final approval. "I never look for any one kind of thing," she said. "I look for something that has style and will photograph." But she added; "I've never been able to define style to my own satisfaction." Not much to go on for those anxious to figure in her pages, but there are certain inwritten, but nonetheless unbreakable rules.

Naturally the house must be untouched by other magazines. The decorating world must be the last outpost of sophisticated civilization where virginity (for houses at least) is not only in, but imperative. And once published, Archi-tectural Digest likes to keep the house exch-sively its own for at least a year, and has been known to pressure designers into total fidelity. For European-based designers, who must vie for the one French, Italian or English story a month, the wait can be a maddening two years. "Twe no interest in making news," said Rense, who admitted to a heavy backlog of European stories." stories. "Good contemporary design should be just as good in 10 years as it is now.".

Also, the do-it-yourself approach is unlikely to meet with success, unless you are Yves Saint Laurent, whose Art Deco Paris apartment is one of Rense's favorites. "In this country there are very few homes I can show that are done by nonprofessionals," she said. But she added: Europe has a tradition of things passed down from generation to generation - a great richness, an expanse of antiques and art --- and an

gone. Now there is just one painting — the best one can afford — quality not quantity." Rense, also editor of the gournet magazine "Bon Appetit," said she found an echo of minimalism in nouvelle cuisine. She was in the

midst of a radical application of the theory when I saw her, in the seventh day of a fast allowing five potassium and protein milk-shakes a day that lost 40 pounds for actor Larry Hagman of Dallas fame and had lost four pounds for her.

But even super-snob Architectural Digest has its critics. "The un-lived-in look," said one editor. "Design isn't messy," Rense decreed, and one does not find children's rooms in her pages. "The quality of the paper and the su-perb photography would make a tent look good," another shelter writer said. Rense may good," another shelter writer said. Rense may be testing out such a stricture with a recen spread on a Connecticut guest house that looks like a motorway convenience lost in a field. "Its writing is very patronizing towards its public and shows an exaggerated reverence towards the lifestyle of its subject," a reader objected. "It appeals to their snobbery and in-ICCUMIV.

Yet Architectural Digest addicts remain fer its Architectural Ligest addicts remain fer-vid. "Our readers are very clubby, vary emo-tionally involved," Rense pointed out. The let-ters-to-editor page has that born-again feeling, leaving correspondents variously "breathless" or "chilled."

"I know the magazine has enormous influence," Rense insisted. "Pauline de Rothschild was fascinated. She said I had revolutionized interior design."

The Research bright and lively is a search bright and lively.

Burgers and Jan (1997) and Jan (1997

bition full of unexpected delights, such as the "Hedgehog under Brambles with Insects, Small Creatures and Reptiles in a Landscape' by Matthias Withoos (1627/1703). This strange work unites the finer qualities of Dutch landscape painting with the meticulous detail of the flower/insect painters to create a mysterious and alarming universe.

Other splendid works include a flower piece and a still life by the late 18th-century French painter Prevost le Jeune; a superb watercolor of a bouquet of asters, carnations, pansies and dahlias by Redoute; a realist canvas of "Flowers in a Vase" by Antoine Volion, still grossly underrated outside his native France; and a fruit still life by E.H. (Eloise Harriet) Stannard, a member of the celebrated family of Norwich School artists.

Inevitably the work of Gluck (1895/1978) of which there is a Memorial Exhibition running at the Fine Art Society, 148 New Bond Street, W.I to Jan. 30, challenges comparison with that of the Paris-based American Romaine Brooks, But whereas Brooks (1874/1970) cultivated a Franco-American monumentality in her portraits of Ida Rubinstein, of Natalie Barney, of Jean Cocteau and Paul Morand, Gluck (nee Ghuckstein, the only daughter of one of the founders of J. Lyons) practised a more intimate style, even in her "grand" partraits of Lady Mount Temple and the novelist Susan Ertz, an intimism made the more so by the three-tier Gluck frame, which was designed and patented by the artist to be adaptable to virtually any environment.

In later years, Gluck involved herself in a deep study of artists' materials, and waged war against the colormen for the inferiority of their against the colormen for the micrority of user modern wares. The purity of her materials counterpoints the purity of her technique in her later paintings, notably in her last work, "Rage, rage against the dying of the light," in-spired by Dylan Thomas' elegy for his father. At Mariborough Fine Art, 6 Albemarle

Street W.1 to Jan. 31 is the first London exhibition of the young English artist John Wonnacott. He lives in Essex in a town on the estuary where the river Thames broadens out as it meets the sea, and works in a bay-windowed studio overlooking the seaboard promenade. Eleven of the 19 drawings and paintings of this show are views from this window, each study of passers-by, weather, the sea and the sky being stemly defined by the studio window frame. These are excellent examples of the portrayal of the everyday in the main tradition of English representation, based on careful perception and great skills of draftsmanship.

Leon Kossoff, whose recent drawings are to be seen at the Riverside Studios Gallery, Crisp Road, Hammersmith, W.6, is, like Wonnacott, emphatic about the importance of draftsman-ship. Indeed, his recorded opinion is that "painting is a form of drawing." It is good, therefore, to see, as it were, the bare bones of his art in these new works, since we are infinitely more familiar with his mountainously impastoed canvases. "Looking back," he says, "it seems that I have been endlessly engaged in the self-imposed activity of trying to teach myself to draw from life."

 URICH -- Most Zurich galleries were ending the year with retrospectives of famous 20th-century artists or shows frecent work by contemporary well-knowns. In both cases, the emphasis is on known quantities.

At Galeric Ernst Scheidegger, some 30 works — paintings, drawings, scalpture and photos — by Laszlo Moholy-Nagy (1895-1946) are on view until Jan. 15. Despite the careful, fused color of the oils or textural beauty of some of the drawings, the artist's overriding concern with visualizing concepts of motion, space and light frequently dematerialize the works at hand, so that one finds oneself concentrating more on the idea than the execution of it.

A series of "photo-sculptures" using figura-tive elements in the relationships that Moholy-Nagy usually imposed on abstract works attains a surreal wit. Particularly beautiful is the artist's 1925 photograph of a house in Switzer-land, with five windows and the electrical wires attached to its facade creating abstraction by pure visual accident. (Galerie Scheidegger, Wettingerwies 2, tcl: 47.13.71 or 252.47.80).

Teniade, the great French art publisher of

me of the most seminal reviews a ed books of this century. On view through January is Marc Chagall's series of 42 lnsh lithographs, published in 1961, as well as Longus' "Daphnis and Chloe" and the complete Verve (Vols. I-X). This magazine, which appeared from 1937 to 1960, featured articles by the finest Freach minds, first-rate photography (Car-tier-Bresson et al) and excellent color plates. Some of the issues were devoted to celebrated books of hours, like the Limbourg Brothers' illuminations for the Duc de Berry, but most featured artists of the time, using their original cover designs and graphics. Among them: Bormard, Braque, Maillol, Matisse and Picasso. (Galerie Komfeld, Titlisstrasse 48, tel: 32.03.60).

The complete collection of another art put lication of long standing, Derriere le Miroir, may be viewed at Galeric Maeght's Galerie 3 until the end of January. Started in 1947 and continuing to the present day, this publication incorporates into the exhibition catalog original texts and graphics by artists showing at Maeght. These have included Braque, Giacometti and Calder, among many others in the past, and Antoni Tapics and Jean-Paul Riopelle in Macgh's Galeries 2 and 1, respec-tively, until the end of January. (Galerie Macght, Predigorplatz 10-12, tel: 251.11.20).

the upstairs gallery, some 40 works by Alan Davie reveal his familiar signs and symbols in a series of luminescent gouaches remarkable for the lyrical tenderness of their language. Downstairs, a contemporary of Davie's, 63year-old Robert Adams, shows a group of brown and gold patina-ed bronzes. If Davie, a jazz musician, suggests the color, textme and mood of music, Robert Adams' elegant bronzes have the cool reticence of notes on a score. (Gimpel-Hanover and Andre Emmerich Galerien, Toedistrasse 40, tel: 202.03.00).

An album, published this year, of 10 color silk screens by Andy Warhol is on view at Galerie Ehrensperger until Dec. 20. Entitled "Ten Portraits of Jews of the 20th Century," it features photo-enlargements with superim-posed color blocks and linear accents of such personalities as Frend, Kafka, Einstein, George Gershwin, Sarah Bernhardt and the Marx Brothers. To what extent these treat-ments reflect Warhol's involvement in the personalities of the subjects is unclear; the superficiality makes one hope, for Warhol's sake, that there was very little involvement, the exercise being more of a decorative, commercially viable effort than anything else. (Galerie Ehrensperger, Racmistrasse 38, tel: 251.01.24).

A Little-Known Italy Revealed in Brussels

by Mavis Airey

RUSSELS - It is a largely unknown and sometimes surprising Italy that's revealed in "Prima Italia," an exhibition of 1,000 years of pre-Roman Italian art at the Royal Museum of Art and History in Brussels until Jan. 7.

Until recently, the Etroscans, with their highly developed culture, were generally regarded as the only artistically noteworthy civifization in Italy prior to the unification of the peninsula under Rome. Now, thanks largely to some remarkable archaeological discoveries over the past few decades, it has become clear that this is not the case.

"Prima Italia" brings together for the first time examples of religious and decorative art, pottery, metalwork and sculpture, from all the different ethnic groups that inhabited the Italian peninsula from the 10th to the first centunes B.C.: Etruscans and Latins, Umbrians and Apulians, Ligarians, Venetians Celts and a whole range of other groups. But what is special about this exhibition, according to the organizers, is not the regional differences, but the remarkable evidence of reciprocal influences and common developments that point to an astonishing degree of artistic unity in Italy from the earliest times.

To illustrate this evolution, the exhibits are not set out in the conventional chronological or geographical order, but according to six key themes: primitive plastic arts, geometric decoration, the oriental style, archaic art, reflections and reactions to classicism, and the Greek epoch.

In the first section, the primitive figurines of animals and people dating from the Iron Age are elongated and stylized. By the mid-eighth century B.C. the bronze smiths of Vulci were producing luxury objects of a high quality that

served as a model all over Italy. The geometric designs shown in the second section have their roots in prehistory, and the abstract motifs and schematic figures constitated a common basis from which all the different Italian cultures evolved.

Italian artists began to come under the influ-ence of the representational art of the Near

East in the sixth century B.C. Flowers and plants and mythical beasts — sphinxes, griffins and winged horses — and narrative scenes began to replace or broaden the geometric style. Particularly open to the Eastern influences were the rich and cultivated Etruscan aristoc racy, prosperous from the export of iron and copper. From the East they discovered writing, and brought Italy into the historical epoch. At-tracted by the wealth of the great centers like Caere and Tarquinia, local craftsmen and foreign artists came to work for the prosperous ente. The Etrusco-Corinthian style they devel-oped spread all over Italy, and their distinctive terra-cotta pottery — incised design on a gleaming black ground — was exposed throughout the Mediterranean.

The fourth section of the exhibition shows the development of archaic art that came with the spread of urbanization and showed itself especially in religious architecture. Temples were richly decorated with statues and friezes, first under the Ionian influence, more sober than the oriental style; later rivaling the Greeks in their attempts to render movement. The classical art of the fifth section reflects

the transformations that took place in Italy in the fifth and fourth centuries B.C. as the Etruscan domination waned and the Roman republic was born. Artists in the big towns of central Italy adopted --- and adapted to --- the stylistic innovations of Polyclitus and Phidias and others, and established an artistic industry of high quality, particularly in engraved

The first section covers the Hellenistic peri-od from the third to first centuries B.C. The third century B.C. was marked by Rome's progressive conquest of Italy, and when Rome headed the artistic renewal in the second century B.C. it was heavily under the influence of the newly conquered Greek kingdoms. Two new genres appeared that were to develop most fully during the empire — the narrative relief and portraits exalting the civic or moral virtues of important people. The exhibition includes some striking examples. Roman domination set the seal on the process of artistic reconciliation that was already under way. Few traces remained except at a popular level of the many artistic forms and styles inherited by the races and societies that lived side by side in different parts of Italy.

Apollinaire and the Avant-Garde

ROME - Guillaume Apollinaire, born in Rome in 1880, grew up as a French citizen in Paris. He became one of the most brilliant catalysts in the years before and during World War 1 in Paris, when all that had been taken for granted was re-examined, when the old values were about to be thrown over.

As a literary personage, founder of new magazines, playwright and poet since 1904, he recognized talent in struggling painters, sculptors, composers, choreographers and writers. This exhibition, "Apollinaire and the Avant-Garde," is based on his Manifesto "L'Antitradition Futuriste" which he published in French and in Italian in 1913 with a list of 175 names, a third of them painters and scuptors. The 89 pertinent works here, examples of Futurism. Cubism and orphism - all terms coined or used by the poet allow us to experience something of the electric atmosphere of a rich and pregnant time.

The Futurists: Boccioni's sculpture, unraveling space; his thoughtful drawings; Carra, Severini, and the indefatigable Balla. The Cubists: a painting, a sculpture, and many drawings by Picasso; Juan Gris' sober elegance; a bright exercise in planar structure by Matisse; Duchamps in a Cubism all his own; Delaunay's buoyant orphism; Kandinski's explosive abstractions; Herbin, Picabia, Gleizes and others (but not Rousseau, Savinie and de Chirico and friends who were not on the Manifesto list.)

The Manifesto, Apollinaire's writings and those of his friends, theater programs of his "Mamelles de Tiresias" and other mementos are also shown with accompanying lectures. Apollinaire was wounded in 1917, but re-

mained active until his death in 1918. "Apollinaire and the Avant-Garde," Galleria Nazionale d'Arte Moderna, viale Belle Arte - Edith Schloss 131, until Jan. 4.

SINESS NEWS BRIEFS

Opposes Continental Western Merger

20122

THE STREET

122

19711111

14.1

DENC

SHINGTON --- The Justice Department said Friday that it opthe proposed merger of Continental Airlines and Western Airlines. the department said the merger would have "an unacceptable ompetitive effect" on airline markets served through Denver and take City. It identified at least 128 routes that would be adversely ed by the merger.

intinental and Western filed their application to merge on Sept. 22, The CAB judge's decision is expected by Feb 6.

Al to Get 4 Boeing 767s in Economy Plan

AVIV --- The Israeli government has signed a \$200-million conto buy four fuel-efficient Boeing 767s to help cut the losses of its

anal airline, El Al, company sources said Friday. Le planes will be part of a new fleet intended to trim El Al's fuel bill restore profitability after three years of losses culminated in a record 5-million deficit for the 1980 financial year. The government has atened to wind up the company unless it reduces its work force and expenses.

rtiss-Wright Raises Offer for Own Stock

OOD-RHOGE, N.I. — Curtiss-Wright, which is fighting a takeover by Kenneust, said Friday that its offered price for 1 million of its i shares will go up to \$46 Monday from the present \$44. Kennecott's ler offer is \$40 a share.

urtiss-Wright also said that Teledyne, which owns about 31 percent Intiss-Wright's 8 million shares, has stated that it does not intend to ster any shares under the increased offer.

hering Merges 4 Units Into New Company Renters

ERLIN — Schering AG said Friday it has merged four subsidiaries

Agricultura, Chemische Werke Rombach, Chemiewerk Curtins and

the new company produces and markets basic chemicals and agricul-the new company produces and markets basic chemicals and agricul-al chemicals as well as services. It is planned to expand the activities Hamm Chemic, including its marketing network throughout Western in ope, Schering said.

mbustion Engineering to Purchase 2 Firms New York Times Service

EW YORK — Combustion Engineering, a major energy-equipment infacturer, says it has agreed to purchase the assets of Huchner-hag of Vienna, which manufactures oilfield wellheads and valves and instrial valves.

combustion Engineering also announced an agreement to purchase assets of Taller Ojeda of Maracaibo, Venezuela, which makes other agreement used in oil and gas production. The agreement is subject to proval by the Venezuelan government.

S. Steel Corp. Predicts Industry Upswing

TISBURGH - U.S. Steel Corp. said Friday it expects domestic industry shipments of at least 90 million tons in 1981 after 84 on in 1980.-

he company said high interest rates, inflation, sagging productivity a excessive taxation were serious barriers to the economic upswing industrial recovery foreseen in the early fourth quarter of 1980, but, ing major international dislocations, steel in 1981 will continue the ving it began in the latter part of 1980.

Harvester Trusts In 1981 Rebound

By Winston Williams New York Times Service

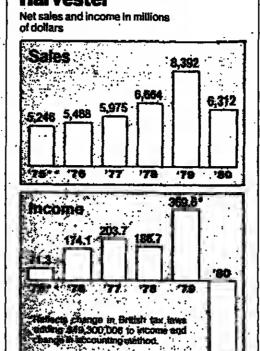

CHICAGO - Plagned by a staggering debt load, climbing interest rates, weak markets and high-cost plants, officers at International Harvester nevertheless expect to muddle through the beginning of 1981. The chairman and chief executive of the beleaguered farm-equipment maker, Archie McCardell, even says he expects the company's setback to be brief. The market penetration of the 150-year-old compa

ny reached new highs in trucks and farm equipment in recent months, Mr. McCardell said recently, and the company rebounded vigorously between April, when a six-month strike ended, and the current hull. He added that he expected the company to benefit also from a record number of new and updated products that would hit the market next year. New products are scheduled to replace items that make up more than a third of normal sales volume.

Most important, company executives said, is that cost-cutting measures and operating efficiencies are beginning to show their effects. These changes, they said, will reduce annual operating costs by \$400 mil-

said, will reduce annual operating costs by 5400 nu-lion from the level of three years ago. "Fundamentally, we have been trying to attack this cost problem that we have. That's the scheme to cure things long-term." Mr. McCardell concluded. "We have eliminated two-thirds of our cost penalty, but we still have a long way to go." The strike settlement, he said, gave the company

work rules and labor costs that are now comparable with those of its competition. Several operations have been sold, phased out or cut back, ending losses of (Continued on Page 10, Col. 1)

1980: A Barren Year For International Harvester

By Mary Tobin United Press International NEW YORK - The Bank of America, the nation's largest bank, and No. 2 Citibank lowered their prime lending rate Friday to 201/2 percent from 21½ percent, as did most other large banks, but an an-alyst said "we're not out of the woods yet" on interest rates. "You have to look at the near

future with a great deal of can-tion," said the analyst, William Sullivan Jr., senior vice president at the Bank of New York. "The economy continues to surprise us in terms of its relative strength." Citibank initiated the move,

which had been expected in view of an easing in most money market rates. Among the dozens who jumped in behind were most of the Top 10 not already at the 20½ per-cent level, including, Manufactur-ers Hanover and Bankers Trust,

First National of Chicago, Conti-nental Illinois and Security Pacific. The third largest U.S. bank,

Chase Manhattan, was the first to the 2012-percent rate 10 days ago and Chemical made the move

Prime Lending Rate to 20.5% Monday. Several smaller institu-tions have moved to even lower which is affected by weather and

BUSINESS/FINANCE

Bank of America, Citibank Cut

Although most market rates have dropped, the key federal funds rate that banks charge each other for loans, a prime source of funds, has been trading at well over the 20 percent level every day this week. Indeed, many banks raised their broker loan rate earlier

this week in response. But most analysts say much of strong, if the business picture does the upward pressure was caused by a sharp drop in bank float and by other year-end factors that reduced not weaken and if govenment sper reserves. Float is the volume of un-collected checks, which shows up around," he said.

NYSE Prices Begin Year With Gain in Slack Day

From Agency Dispatches NEW YORK — New York Stock Exchange prices scored gains late Friday to finish the first tradine day of the first rise in October but still leaves inflation-adjusted construction spending 12 percent below a year earlier. trading day of the new year on a strong note, but with weak volume. New orders received by U.S. manufacturers rose \$1.57 billion,

The Dow Jones industrial average rose 8.79 points to 972.78 after being trendless earlier. Advances led declines two to one on volume of about 29 million shares, down from 41 million Wednesday.

One analyst said the strength could bode well for the year. Ac-cording to Wall Street folklore, the first days or month of the new year are considered indicative of the market's direction for the enitre

Investors were hopeful that the prime rate reductions Friday showed that interest rates have peaked. However, some experts have warned that the rates are volatile at this time and could head

higher anytime. After the close, the Federal Re-serve Bank of New York reported that business loans at major New York City banks fell \$1.22 billion in the week ended Dec. 24. The drop followed an increase of \$121 million the previous week and a rise of \$179 million in the year-earher week. The Fed said U.S. moncy supply figures would not be available until next week.

In Washington, the Commerce Department reported that construction spending, as measured in inflation-adjusted dollars, rose 1.5 percent in November to a seasonally adjusted annual rate of \$101.4 billion. This followed a 0.2 percent

October. Originally, the depart-ment said new factory orders had risen 1.7 percent in October. The department said shipments rose \$1.69 billion, or 1.1 percent, in November to \$158.39 billion af-ter a 2.6 percent increase in Octo-ber. The backlog of orders rose 0.4 ber. The backlog of orders rose 0.4 percent in November to \$28.1 bil-lion after a 0.5 percent increase in October.

or 1 percent, in November to a sea-sonally adjusted \$159.63 billion,

the department said. The increase

follows a revised 1.8 percent rise in

holidays. Mr. Sullivan said, however, that

while there are strong arguments

for the theory that rates have

peaked, "we are worried about fed-

eral spending and concerned about the potential for money supply growth in January that could prompt the Federal Reserve to

tighten up again." "If credit demands remain

countries. The Ford quotas were phased out by Mr. Carter last Feb-ruary, when the industry initially sought protection under the trigger Such a procedure would provide less protection than coverage un-der, the so-called trigger price mechanism, a similar device that, price mechanism. Sympathetic

Carter Reported Weighing Specialty Steel Import Aid

in effect, sets minimum prices for imports. The trigger price system "triggers" a formal investigation of In the interagency debate that dumping when prices of imports drop below the minimum levels. Trigger prices were restored to

went on over preparing the options paper for the president, the Com-merce Department and the Office of the U.S. Trade Representative have been sympathetic to the in-dustry's demand for new protec-tion. But both agencies supported the antisurge device as more ap-propriate than trigger price coverbasic steel Sept. 30 after having been suspended since March, and the industry has sought to have that system cover specialty steel as well. One of the arguments of the specialty producers is that compa-nies are diverting shipments from basic to specialty steel to get around the tougher import con-

The Council of Economic Advisers, primarily worried about the, inflationary impact of higher im-port price levels, opposed any new measures. One major argument against protection is that, during Specialty steel is a category of generally higher-priced but rela-tively low-volume steel, such as stainless wire rods, that traditionthe quota years, the industry man-aged to increase its profitability aged to increase its profitability and efficiency and is now in a much stronger financial position ally is considered separately from

asic steel in trade policy. President Ford drew criticism than basic steel to resist import competition. The State Department, sensitive from Europe in 1976 when he imposed quotas on specialty steel im-

ported from Common Market to the impact of protection on European trading partners and Ja-pan, allied itself with the economic council.

Specialty steel producers, situated mainly in western Pennsylva-ma, Ohio, Illinois, Texas and the area around Buffalo, N.Y., account for less than 3 percent of domestic steel tonnage but almost 10 percent of the \$20-billion to \$30villion annual sales volume.

Unemployment

The industry employs 65,000 workers. For those making the products previously protected by import quotas, unemployment has been running as high as 30 percent.

About 12 percent of all specialty steel used in the United States is imported, a lower import penetration than for basic steel. But for some specialty products, the peno-tration levels are running much higher. In the first nine months of 1980, imports of tool steel account-ed for 27 percent of domestic production and of specialty rods nearly 40 percent.

In campaign swings through western Pennsylvania, both Mr. Carter and Ronald Reagan made guarded statements generally sup-portive of steel industry protection.

"If it is possible to do so," Mr.

Quebec's Anglophone Advertisers **Protest Official Ban of English**

United Press International

MONTREAL — English has disappeared from all business advertising on the streets of Quebec Province, legally replaced by Freach, but a steakhouse owner moaned, "How do you translate Curity Joe's?"

Most Quebec companies complied with Wednesday's sign law dead-line, but English diehard Allan Singer called the legislation "malicious, vindictive and a Nazi-like symbol of arrogance."

Vowing to fight in court to keep French off his Montreal stationery firm, he said: "I've been in this business for 58 years and done just fine in English, and I'm not going to denigrate my own language."

The law, part of the extensive language reform passed by the separatist Parti Quebecois government in 1977 to promote the use of French in the 80-percent French-speaking province, also requires that firms register under a French corporate name.

"How can you translate Curly Joe's?" said Magdi Nicholas, manager of the steakhouse. He agonized for months with language office officials on how to render "Curly Joe's" in French. "I guess if this goes on much longer," he chuckled, "we'll have to go to prison."

Similar problems occurred with the Curry Inn. The language office said the literal translation, Auberge dn Currie, was unacceptable because it implied there were rooms for rent.

The Work Wearhouse, a clothing company, merely adopted a French phonetic spelling of the chain store's English name, and became La Ouerasse (pronounced "ware-haws"). The language office said the name was bad French and might be rejected.

kle when his father chuckles, and roots, and is there gnawing away finds that his father will chuckle for no other reason than to hear at the ineffable beginning, burrowing after unfathomable meanings; the boy chuckle in return - Beckett recalls himself to his austerity: "Quick leave him." And we do. We that the crunch-crunch that reaches us is that of a magnificent mole digging into the darkest dark for are back in the dark, waiting inside daylight, for enlightenment." a fable

"Till finally you hear how words are coming to end. With every in-ane word a little nearer to the last. He doesn't find any daylight, not this time around, anyway. The mind to which we are introduced in "Company" doesn't even have a oame, not Winnie or Krapp or Pozzo or Ham, nor Murphy or And oow the fable too. The fable of one with you in the dark. The fable of one fabling of one with you in the dark. And how better in the end labor lost and silence. And Molloy or Malone, not even the Auditor or the Mouth. At one point Beckett allows this mind to you as yon always were. Alone."

Is the mind, then, on its back in be an "L" but only for a moment. The mind is otherwise trapped in the cradle or the coffin, conscious-"he" as it contemplates its own machinery, or in "you" when cerness itself? In doubting the fictions of time, space, memory, light, sound and language and the very notion of a "we," does it condense tain memories are being discussed.

to a vanishing point? This, of Who discusses these memories, course, is the terminal art for which Beckett has been praised Who discusses these menories, in the dark, with a mind lying on its back, a mind — wintage Beckett — crawling backward? The Voice does the discussing, the hinting. The Voice fades in and out, like a and abhorred, a kind of strip-mining of the soul, nihilism in quietude, Earlier, however, and especially on the stage, there was radio signal from an alien star. The laughter.

mind cannot be sure that the Voice There is very little laughter in "Company." It is as if the mole went down the Yggdrasil tree and is talking to the mind; the Voice may be talking to someone else in the dark, which would mean that devoured the roots and the tree fell the memories - of being born the down on the reader and oo bird sang. Why write at all? That is a of two lovers in a summer house with their eyes closed against the question Beckett has been asking for years, discarding commas and rainbow light - do not belong to the mind at all; they are a strangsemicolons as he discards personahty and history. "Company" takes less than an hour to read; for at least one reader, unfortunately, it will take much longer to forget.

The mind, operating, as Beckett tells us, on a "weak level of mental John Leonard. is on the staff of The New York Times.

activity," thinks about what can and what cannot be known. It longs for the company of the Voice, but isn't sure that the Voice 'Pre-Man' Skull, is talking to it, or that it hasn't **8 Million Years** dreamed the Voice in order to have some company. The mind crawls backward into itself, and must be-gin again "from nought anew." Memory is in doubt, and so is

It was Robinson's kickoff after his tying field. goal that was botched by Stone and Barber. Each had begun moving up to en-gage the Georgia coverage — each with the intention of blocking for the other. The bell wild a complete the store the stor nonneed in August he was step-ping down after this season. His current team, which was undefeat-ed and once-tied through its first 10 gaines, lost its last two - to Southern California Dec. 6 and then in the Sugar Bowl - to give the Irish a 9-2-1 record. the other. The ball sailed over their heads, and Kelly had the biggest recovery of his life.

Another Bowl Victory

Georgia quarterback Buck Beine tried to sneak in from the 1 but got nowhere. Then he gave the ball to Walker, who took a running leap high over the packed blockers and tacklers to fall into the end zone. Robinson kicked the extra point, and Georgia led, 10-3, with 1:06 left in the first quarter. After the game, the National Football Foundation and Hall of Fame announced that Georgia was the winner of the MacArthur Bowl, which the hall gives each season to the team it considers No. in the nation.

But the real reward for the Bulldogs should come Saturday night, when the final Associated Press and United Press International The Buildogs went after the ball polls will be released. Georgia, having gone into this game rated ance again just after the second pe-riod had started, forcing John Sweeney, the Irish fullback, to give it up at the Notre Dame 22. Georgia roverback Chris Welton No. 1 in both polls, seems likely to retain that spot.

"This game is typical of the kind of game we have against good teams," Coach Vince Dooley said.

"I'd like to think we make our own good forture. We are constantly gnawing at people. Some phase of our game finds a way to win. Our defense coming up with the big play was how we won to-

Schembechler Ends Postseason Drought

The Associated Press

PASADENA, Calif. - Power unning by Butch Woolfolk and timely passing by quarterback John Wangler ended Michigan's postseason drought New Year's Day as the Wolverines hammered Washington, 23-6, in the 67th Rose Bowl game.

The victory gave Michigan Coach Bo Schembechler his first bowl triumph after seven losses five of them in Rose Bowls.

182 for 26

Woolfolk, a 207-pound junior, ran for 132 yards in 26 carries for the Big 10 team and scored the first Michigan touchdown on a 6yard run

Wangler, who missed four of his first five passes, finally caught on and his production included a 7-yard touchdown throw to Anthony Carter in the third quarter that clinched victory.

Outplayed in the first quarter and trailing 3-0 in the second peri-od, the Wolverines moved 80 yards in nine plays, including a key 19-yard pass from Wangler to Alan Mitchell, carrying to the Washing-ton 8. Woolfolk gained two yards

quarter, booted one from 26 on the final play of the half for all of the Pac-10 team's points. Wangler-to-Carter In the third quarter, Ali Haji-Sheikh kicked a 25-yard field goal and Wangler, who originally didn't

before scoring on the following

figure in Michigan's plans after being burt in the Gator Bowl fol-lowing the 1979 season, threw to Carter, who caught his 14th TD pass of the season. Late in the fourth quarter, full-

back Stan Edwards, who played in Washington's 27-20 upset of Mich-igan in the 1978 Rose Bowl, crashed 1 yard for the game's final

The Michigan field goal also was set up by a Wangler pass, again to Carter for 26 yards over the middle, reaching the Washington 11.

A crowd of 104,863 watched the Wolverines end their postseason jinx under the Schembechler regime. His teams in addition to losing five previous Rose Bowls also bowed to Oklahoma in the Orange Bowl and North Carolina in the Gator Bowl.

Both Michigan and the Huskies went into the game with 9-2 re-cords. The Wolverines hadn't allowed a touchdown in 18 quarters coming into the agme - and maintained the record by inches. Early in the game, Washington fullback Toussaint Tyler was stopped just short of the goal on a fourth-down

Wangler suffered a serious knee injury in Michigan's 17-15 loss to North Carolina in the Gator Bowl, missed 1980 spring practice and didn't come back until taking over at quarterback after the start of the Notre Dame game, second on the

Michigan schedule. From then on, the 192-pound senior has been the regular, although he runs infrequently as Schembechler wanted to take no chance with his quarterback's ince.

Late Bloomer

Wangler, after his poor start, wound up with 12 completions in 20 tries for 145 yards with no in-

Washington quarterback Tom Flick hit on 23 of 39 passes for 282 yards but had throws picked off by Brian Carpenter in the second Bears had moved to the Alabama 15 — thanks mainly to an interference penalty against the Tide. But on first down, running back Dennis Gentry was clobbered by quarter and Keith Bostic in the fumble was recovered by Alabama. di nite

NEW YORK - Will the muddy field be frozen in Cleveland? Will Tom Landry's play selections be-fuddle the young Atlanta lineback-ers? Do the Vikings stand a chance?

compared to the sums won and

These are among the questions as the National Football League playoffs move into the second round this weekend with the six division champions playing for the

Saturday Games

Competition begins Saturday at Philadelphia, where the Eagles, National Conference East champions, will play Minnesota, winners of the Central Division. Then the Chargers play Buffalo in San Di-ego in a match between the American Conference West and East champions.

On Sunday, Oakland, the surviv-ing AFC wild-card team, plays the Browns, AFC Central winner, in Cleveland, followed by the game between the Dallas Cowboys and the Falcons in Atlanta. The Cowboys are the NFC wild-card entry; the Falcons are NFC West champions.

Winners will play the following Jan. 11 in the conference championship games, which qualify op-ponents for the Super Bowl in New Orleans Jan. 25. Previews of this weekend's games (regular sea-son records in parentheses; point spreads from Nevada scources).

American Conference

Oakland (11-5) at Cleveland (11-5): The condition of the field will be a consideration; most of the grass is gone in Municipal Stadium. Reggie Ricker, the Cleveland wide receiver, says: "Bad weather is part of our personality. It might

bookie would have to the head. The big bettors realized that long ago and went back to the books, who now get the choiceFlorida State's Ricky Williams, business and let. OTB handle the nickles and dimes. Business and let. OTB handle the seconds remaining in the second quarter. The Seminoles also scored on a 19-yard field goal by Capece with 19 seconds left in the third period.

With about 12 minutes remaining in the game and the score tied at .10, Oklahoma faced a fourthdown situation at its 33-yard line when center Mark Lucky's snap sailed through Keeling's hands and rolled toward the Sooner goal line. Keeling retreated and tried, as he was just inside the 5, to kick the grounded ball back through the end zone for only a safety. But he was decked by FSU's Ron Hester and the ball dribbled into the end

DALLAS - Peter Kim kicked three field goals and a defense led by All-American end E.J. Junior forced six turnovers as Alabama rolled to a 30-2 victory over Baylor in the 45th Cotton Bowl Thursday. Baylor's offense was all but blunted by the swarming Crimson Tide defense, which halped bring Alabama coach Bear Bryant his 306th career triumph. Bryant will thus go into the 1981 season needing just nine victories to become the winningest collegiate football coach ever.

Baylor could manage only 36 total yards - including 12 on the ground in 14 tries - in the first half. Alabama was penalized for more yards in the first half than

Baylor could gain on its own. Kim kicked field goals of 29 and 28 yards in the first half and added a 42-yarder in the third quarter. The three field goals tied a Cotton Bowl record set in 1972 by Penn State's Alberto Vitiello.

When the final gun sounded, Michigan players, the seven seniors having dedicated the game to their coach, hoisted Schem-bechler on their shoulders and carried him to midfield. Woolfolk was named the game's

cluding Michigan's victory.

NFL Playoff Questions Are Getting Tougher

By William N. Wallace New York Times Service The same will match an out-

standing offense, Cleveland's, against an exceptional defense, Oakland's. When the Raiders have the ball, it will be a mediocre offense against a mediocre defense.

chance first time. All four home teams are

Pass and Catch

The Browns' passing attack averaged 244 yards, second only to San Diego's, but the Raider de-fense led the league in interceptions. The Cleveland offensive line includes three Pro Bowl nominees. Joe DeLamielleure, Doug Dieken and Tom DeLeone. The Raider defense attacks: It had 54 sacks, second best in the AFC.

Sipe can be expected to keep that defense off balance with an occasional running play featuring fullback Mike Proitt. Oakland will try to set up Jim Phinkett's less ef-

ers.

as well be miscrable. We're used to Betting choice: Cleveland by 3

Buffalo (11-5) at San Diego (11-5): Dan Fouts, the quarterback with dazzling statistics, suffered five interceptions in San Diego's five interceptions in San Diego's playoff loss to Houston a year ago. The Chargers will attempt to surprise Buffalo's excellent young defensive unit by running the ball more often. As a result, Chuck Muncie could be a key factor. Sam Rutigliano, the Browns coach, says: "We're healthy. We've got the league's best quarterback, Brian Sipe, and we've got an excellent

Chargers Hurting

The Chargers have some concerns about injuries on defense. Questionable performers are Mike Williams at cornerback and Woodrow Lowe at linebacker.

Although this will be the first playoff game for most of the Bills, they did beat the Chargers Oct. 6 in San Diego, 26-24. Their defense was No. 1 in the league in fewest yards allowed per game, 256, and No. 1 against the pass, 142 yards. The Chargers led the league in

passing yards, 283. San Diego by 5%.

National Conference

Minnesota (9-7) at Philadelphia (12-4): The Vikings lost Sept, 14 to the Eagles, 42-7. "That was cons ago," says Bud Grant, the Minnesota coach. His team won six of its last eight. The Eagles, playing a more difficult schedule, lost three of their last four.

The Edge

Comparisons favor the Eagles, whose defense has the potential to hold the Vikings scoreless. Minnesota's chances hinge on quarterback Tommy Kramer, who can be

brilliant or quite a bit less. Ahmad Rashad will be Kramer's primary target, and the Eagles will swarm over him. Minnesota's running attack, what there is of it, should be of no concern to the Eagle linebackers.

The Philadelphia offense is pre-dictable, with the halfback Wilbert The Falcon offensive line has been first-rate — the quarterback, Steve Bartkowski, impeccable, and the running backs, William An-drews and Lynn Cain, bruising. Montgomery representing the point of the attack. Minnesota has had difficulty in stopping a good running game. The Eagles will go without Charles Smith, their lead-Dallas has two defensive starters out, linebacker Mike Hegman and safety Randy Hughes. Guy Brown replaces Hegman, and Dennis ing reciever, but Scott Fitzkee is an

able replacement. Philadelphia by Thurman, who started for Hughes Dallas (12-4) at Atlanta (12-4): through most of the season, is the free safety. Bartkowski will attack Landry calls the plays for the Cowboys, and he will almost certhe cornerbacks, and Dallas must tainly be calling for Tony Dorsett to run. "Any time Tony gains 100 yards or more we'll wm," Landry generate a pass rush. Atlanta by 2.

said last week. But the Atlanta defense, with rookies Buddy Curry, Al Richard-son and Ken Johnson, has been formidable at stopping rushing attacks. The Falcon secondary has been less successful against good passers and depends on help from

the four linebackers. Ashe Selects 4

For Davis Cup United Press Inte

CARLSBAD, Calif. - U. S. Davis Cup captain Arthur Ashe has named John McEnroe, Roscoe Tanner, Stan Smith and Bob Lutz to the squad that will meet Mexico in March.

McEuroe will be making his fourth consecutive appearance; he has an 11-2 cup record. The current U.S. Open champion was instrumental in the cap titles won by the United States in 1978 and 1979,

Smith will be making his 11th appearance, matching the record of Bill Tilden. He last played in 1979 against Italy, teaming with Lutz for a doubles victory in a 5-0 U.S. sweep. Lutz will be on a cup squad for his eighth year.

The Associated Press MELBOURNE - Guillermo Vi-las reached the semifinals of the Australian Open tennis tournament Friday with a 7-5, 6-4, 2-6, 4-6, 6-3 victory over John Sadri. Vilas is only two matches away from becoming the third player in

history to win the open title three consecutive years. Jack Crawford and Roy Emerson are the other and Koy Emerson are the other three-time, back-to-back winners. Vilas will face Kim Warwick Saturday; Warwick took Bill Scan-lon, 6-4, 6-2, 4-6, 6-1, Friday, while Brain Teacher gained the semis with a 6-4, 4-6, 6-0, 7-6 victory over Paul McNamee. Teacher will play Peter McNamara who advanced Peter McNamara, who advanced with a triumph Thursday over Pe-

Arizona State Team **On NCAA Probation**

MISSION, Kan. - The NCAA has placed Arizona State's football

program on probation for two years for rules violations. The team will be barred from appearing on

ademic year. The penalties stem from an NCAA investigation following allegations of ticket-sale irregularities and the awarding of unfounded academic credit to eight play-

fective passing with the outside running of halfback Kenny King.

Art Buchwald Survival of Fastest At Transition Time

WASHINGTON - Nobody which is attached, was done by an outside consulting firm. There could be hundreds - even thousands. They are members of come in, which was done by anoth-Reagan's transition team, and they are sweeping through government buildings, trying to find ways to firm. By the way, I voted for cut out waste and sloth in the bureaucracy. It isn't an easy job, but

Page 14

it has to be done. As soon as word is passed that a transitiou team is on the premises, every bureaucrat rushes to his or her desk and gets to work. Bureaucrats have been through it all before, and Buchwald

the transition people are, in most cases, babes in the woods.

This is how it goes: * * *

A transition team member stops hy a desk.

"What are you doing?" he asks the bureaucrat. "I'm working on these author-

ization papers for my supervisor." "Where is your supervisor?" "He took holiday leave and I be-

lieve he is in New Hampshire ski-

ing with his family." "May I see those authorization "Of course, sir. As you will note,

in the first 40 pages, the anthority concurs with the regulations as laid down by the secretary. The next 32 pages deal with the impact study, and this bound report,

Video Cassettes

LONDON - The Royal Opera House in Covent Garden announced Friday that it has signed an agreement to permit the recording on video cassettes of at least three operas or ballets a year produced under its auspices for the next five years.

The agreement includes the British Broadcasting Corp., a new company, Covent Garden Video Productions, and is an interim arrangement pending final agree-ment with the interested unions.

The unions have agreed to permit the recording and sale . - to test the market — of the Offen-bach opera, "Tales of Hoffmann" and the bailet, "La Fille Mal Gar-

"We still have one more study to er consulting team, checking out

the findings of the first consulting Reagan * * *

"What exactly are you authorizing?" "Funds for deregulation of the

clam-digging business." "Why do you need money to deregulate an industry?" "If you read the report, you'll

see that it takes as much money to deregulate an industry as it does to regulate one. My father and mother were both Republicans."

We're looking for ways to cut out waste and sloth in government. Do you have any ideas?"

Can I speak frankly, sir? I've been working on this problem secretly for seven years, but no one will listen to me. That's why my

wife also voted for Reagan. First, we have to set up an ad-hoc com-mittee on waste and sloth, which would create a department independent of the inspector general's office. This department would be staffed and housed in its own building so that it would not be contaminated by the people who are throwing the taxpayers' money down the drain. I have the plans here for the new building if you would like to see them."

"It's a very large building." "When you're looking for waste and sloth in the government, you can't operate on a shoesting. Once

we get the department in shape, I suggest we turn it into an inde-Opera to Market pendent agency, which would re-port directly to you."

"But I'm only on the transition team. I don't believe I'll be around after Jan. 20."

* * *

"That's a pity. It was your idea, and you can't see it consummated. Can I have your name, sir? I'd like to tell the president-elect you're the most valuable transition team person I've talked to." 'It's Elrod. Melvin Elrod, of

Tulsa, Okla." "It's an honor to meet you, Mr.

Erod. My name is Duval, Harvey Duval. My supervisor's name — the one who is skiing in New Hampshire — is Garfield Flieger." "What kind of supervisor is he?"

"A very fine person. You can go into his office. It's the one that has a personally autographed photo of President Carter on the wall."

mean. The way the picture comes

out, somebody thinks I was a mean guy, I don't blame 'em. But

- as if you might look

"To become champ I thought

as she remembers it all. "I didn't care if be was jealous It wasn't just of men. He was jealous of my family, my girl-friends. You gotta realize, I was 15½ when I met him, he didn't like that, it's the truth, If I had no girlfriends, so what, I had my man.

Former champion Jake La Motta with former wife, Vickie. Jake looks at her like he's puzwant anybody influencing me, he zled, like what-is-this-anyway. "I four different plays. I did 14 think he thinks you mean you movies, mostly B-types." don't care what I think." He holds out his hands "Fu-Jake listens. Jake waits. Jake could always take a hard shot, be "Let me finish," she says. "He was my man. But at the end, in it words or fists. He recalls that

Miami, he was loud, boisterons, bragging, everything I don't like in a man."

"That reminds me, that re-minds me, that reminds me," Jake says, lighting a Mariboro Light with slow-fingered care, as if it ware a cigar. "You started getting jealous yourself, you started checking up on me." "Jake was fooling around," she explains. "The drinking. He was

crazy. I thought it was the punches he'd taken." "It was the booze," he says, with a gimme-a-break voice. "I was sick mentally. I thought I wasn't satisfying her sexually."

"He didn't realize," she says, "it's like a lot of men -- can't do without it, they have to have it once a week. But for women it isn't the final act - it's the lovemaking they want. Even when he was in training, we'd be "What did I know?" Jake says.

"I started boxing when I was 17, after I got out of reform school. That's all I knew." They're friends now, they say, They have both been working as

technical consultants on the movie in which Robert De Niro plays La Motta. In the book, La Motta says, there were boos before and after he beat the Frenchman, Marcel Cerdan, for the title. "I didn't hear it, if it was," says Vickie,

bristling.

"So what," Jake says to her. "There's booing in every fight." "What I'm saying is that the achilation drowned it out, she

They glower at each other. Vickie purses her lips and pops them apart in a big kiss through the air at him.

He lifts his fist again. "You're gonna get it."

"That's why I gave you the kiss," she says. She looks sly, happy, certain. She's gone a milhon rounds with him. She can do it and paint her fingernails at the same time, which she does.

He's been up, he's been down, she's seen it all

"I made a couple million fighting, I went through everything. When De Niro came into my life I was just managing, paying ex-penses. It's been a steady climb, showly, two steps up, one step down. I'd like to do legitimate theater. When I left Miami im 1958, after a six-month jail term for the morals offense! I went to dramatic school for two years. Two years. I played the lead in

erybody looks at these hands and says 'Artistic Delicate.' It makes me think I wasn't meant to be a fighter. I have fine talents."

Recitation

He once even put on "An Evening With Jake La Motta," in which he did a one-man recitation from the works of Shake-speare, Paddy Chayelsky, John Steinbeck and Budd Schulberg — the Schulberg script from "On the Waterfront," in which Marion Brando plays Terry Malloy, the punch-drank loser who gives the taxicab soliloquy to the brother who convinced him to throw a fight, and his career, "for the short-end money."

"You want me to do it for you now?" Jake asks.

He hikes his shouders, looks away, and then turns back to deliver it, word for word: "You was my brother, Charley, you shoulda took care of me a little bit. . . You said: "Kid, this ain't your night' ... I coalda took Wilson apart. ... But what happens? He gets a title shot outdoors in a ballpark and I get a one-way ticket to palooka-He flares his hand from his

chest, he frowns, he pleads, he slumps. It's not Brando but it's all right. . . I conida been a contend-

WHY DON'T YOU CALL US FOR

with this terrible government in the year 1981," he said as he climbed into a chauffeur-driven And think of it: Jake La Motta car. "I am much better." His eye was champion of the world.
